**Gastrointestinal Endoscopy** Oliviu Pascu, 2011-11-21 Endoscopy has had a major impact in the development of modern gastroenterology. By using different data it provided a better understanding of pathogenic mechanisms, described new entities and changed diagnostic and therapeutic strategies. Meanwhile, taking advantage of many technical advances, endoscopy has developed spectacularly. Video endoscopes, magnification, confocal and narrow band imaging endoscopes, endoscopic ultrasounds and enteroscopes emerged. Moreover, endoscopy has surpassed its function as an examination tool and it became a rapid and efficient therapeutic tool of low invasiveness. InTech Open Access Publisher selected several known names from all continents and countries with different levels of development. Multiple specific points of view with respect to different origins of the authors were presented together with various topics regarding diagnostic or therapeutic endoscopy. This book represents a valuable tool for formation and continuous medical education in endoscopy, considering the performances or technical possibilities in different parts of the world. *New Techniques in Gastrointestinal Endoscopy*

Oliviu Pascu, Andrada Seicean, 2011-10-03 As a result of progress, endoscopy has become more complex, using more sophisticated devices and has claimed a special form. In this moment, the gastroenterologist performing endoscopy has to be an expert in macroscopic view of the lesions in the gut with good skills for using standard endoscopes with good experience in ultrasound for performing endoscopic ultrasound with pathology experience for confocal examination. It is compulsory to get experience and to have patience and attention for the follow up of thousands of images transmitted during capsule endoscopy or to have knowledge in physics necessary for autofluorescence imaging endoscopy. Therefore, the idea of an endoscopist has changed. Examinations mentioned need a special formation, a superior level of instruction accessible to those who have already gained enough experience in basic diagnostic endoscopy. This is the reason for what these new issues of endoscopy are presented in this book of *New techniques in Gastrointestinal Endoscopy*. Practical Pediatric
