Michael F Shlesinger,2021-06-29 This volume comprises the author s account of the development of novel results in random walk theory and its applications during the fractal and chaos revolutions The early history of probability is presented in an engaging manner and peppered with pitfalls and paradoxes Readers will find the introduction of Paul L vy s work via Mandelbrot s L vy flights which are featured uniquely as Weierstrass and Riemann random walks Generalizations to coupled memories internal states and fractal time are introduced at the level for graduate students Mathematical developments are explained including Green s functions inverse Mellin transforms Jacobians and matrix methods Applications are made to anomalous diffusion and conductivity in amorphous semiconductors and supercooled liquids The glass transition is discussed especially for pressure effects All along the way personal stories are recounted and special appreciations are made to Elliott Montroll and Harvey Scher for their ever expanding influence on the field of non equilibrium anomalous processes that now are found in topics including disordered materials water table processes animal foraging blinking quantum dots rotating flows optical lattices dynamical strange attractors and strange kinetics **Raising Frankie** Brenda B. Moody,2022-03-09 As

a college student he was blessed to become a student intern in the Information Technology IT department where he continued to increase his computer skills as a part time computer lab assistant and a computer troubleshooter These roles pushed his skilled to a brand new level After the internship was over I followed my instructor everywhere he went so I could learn everything I could I even stayed after hours to glean from his knowledge His instructor told him that he had never met anyone like him before Someone who was hungry for knowledge After graduating with a degree in computer science he was offered a part time job in the IT department That job later became full time As a contributing co author to Raising Frankie he visited his parents twice a week to proofread and suggest any changes he felt were necessary They wanted to make sure he was comfortable with every line before it went to publication Since he has embraced the book the three of us hope readers will share its content to assist anyone they know who is or have dealt with ADHD Brenda is a retired educator who lives with her husband in North Carolina During her academic career she served in several capacities in the educational arena These

positions included teaching academically gifted to disadvantaged and handicapped students in high school high school assistant principal and supervisor director of Career Technical Education Programs She has also taught on the community college level In her community she serves on several church auxiliaries to include serving as a deaconess member of the senior usher board and as a Sunday school teacher Because of her experiences working with attention deficit hyperactive disorder ADHD via students and their teachers she wanted to share her knowledge and experiences with others through Raising Frankie She hopes that loving and living this work will positively impact the lives of others as it has the Moody family Frankie L Moody Sr Moody coauthor is a United States Army Veteran and a retired lieutenant with the North Carolina State Highway Patrol Presently he is actively serving as a church deacon president of the male ushers Security Team member Cub Scout Den Leader and as a literacy tutor for adults with Triangle South Literacy Works He also is employed part time to transport people to and from medical appointments In his years of working with people Moody often imparted words of wisdom and encouragement whenever the opportunity presented itself Brenda and Moody worked passionately together to first of all understand the characteristics of ADHD Secondly to embrace Frankie s diagnosis so they could help him to deal with whatever he may have encountered academically as well as socially during his formative years Toward that end Moody spent his days off each week serving as a teacher assistant s when Frankie was in elementary school He also chaperoned every field trip and assisted with all of his sport activities During high school we worked together as a team to support Frankie as needed to include how to handle unwarranted bullying During high school and college we realized that Frankie needed space to make his own decisions With that said we were always available and ready to activate whatever actions as were necessary to help Frankie to be successful without encroaching on his I can do it on my own abilities

Fair Winds and Following Seas Ronald Vail, 2013-04 This book relates the military experiences compiled from a twenty five year naval career of a small town boy whose elementary and high school endeavors were somewhat less than satisfactory but who was given the opportunity provided by that inconceivably destructive event known as World War II to redeem his poor educational activity and serve in the Navy reasonably successfully The book follows his career as he rose from a very young and inexperienced Ensign to the rank of Commander Early on he acquired a specialty designation as cryptologist dealing with codes and ciphers in the Naval Communications system This book depicts the good times the hard times and the difficult times of the voyage to the top of the military organization in which he spent the biggest part of his Navy career He spent many years in the field spreading the communication security gospel directly to the communication officers of various ships and stations Finally after 20 years of total service he was assigned to the Naval Security Group Headquarters in Washington D C as deputy to the head of the Communication Security Organization with oversight and management responsibilities over the field activities Later when his boss was assigned to duty at a field activity he was elevated to the head of the organization After about a year as head of the Communication Security Organization he was given a very promising assignment as

Commanding Officer of a newly established Naval Security Group command in California As expressed in the book this was a Camelot assignment Shortly after World War II ended and very early in his career he met and married his lifetime companion This relationship produced six children five daughters and a son who survived a change of venue every two to three years and all became college graduates including one daughter who was born with a physical disability denying her the ability to get around without assistance All achieved exceptional success in their chosen occupational pursuits He and his bride s commandment that all the children must expect to stay in school at least sixteen years was really very rewarding for them in their later lives The book concludes with a comparison of his Navy life with the famous and well used Navy description of a hypothetically perfect sea voyage Fair Winds and Following Seas

Mathematics for the Life Sciences Glenn Ledder,Jenna P. Carpenter,Timothy D. Comar,2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see
