How Much Does Spinal Decompression Treatment Cost:

Decompress Dr. Leonard Molczan, 2012-02-28 Dr Leonard Molczan's DECOMPRESS Live Your Life Free From Back Pain offers readers a better solution for eliminating their chronic low back and neck pain without reliance on medications or spine surgery through the revolutionary technology of non surgical spinal decompression. As many as 31 million adults are affected by low back pain at any given time while experts estimate that 80% of the population will experience a back problem at some time in their lives. Dr Molczan details these sobering statistics while debunking the effectiveness of common treatments for chronic low back pain as well as the financial and emotional strains these quick fixes can cost an individual. He introduces us to VAX D Therapy, a non surgical spinal decompression that literally reverses the effects of gravity on our spines. Created by Dr Alan Dyer, VAX D Therapy has been touted by many as a medical breakthrough revolutionizing the treatment of chronic low back and neck pain. Peer reviewed studies have shown VAX D Therapy to be highly effective with results that last. Said simply, VAX D Therapy works. Dr Molczan has a superior understanding of how and why the spine degenerates and offers a wealth of knowledge to guide those who are suffering needlessly. Within this book, he teaches us how to take responsibility, explore all treatment possibilities towards ultimately finding a solution, not just palliate symptoms. Dr Molczan has been successfully treating chronic low back pain for over a decade. For many of the people who sought his consultation, he was their last hope. That last hope most often resulted in success through the use of VAX D Therapy and additional support. Say YES to DECOMPRESS and you too can Live Your Life Free From Back Pain because as Dr Molczan succinctly puts it, living in pain is not living at all.

Applied Methods of Cost-Benefit Analysis in Health Care Emma McIntosh, Philip Clarke, Emma Frew, Jordan Louviere, 2010-06-24 This book provides the reader with a comprehensive set of instructions and examples of how to perform a cost benefit analysis (CBA) of a health intervention. Developed out of a course run by Jordan Louviere at the University of Technology Sydney entitled An Introduction to Stated Preference Discrete Choice Modelling, it has a particular focus on the use of stated preference survey methods to identify consumer preference data as well as the use of recent developments in cost effectiveness analysis within a CBA framework. In doing so, the most up to date methodologies for CBA are compiled in a comprehensive manner with the aim of advancing the methodology of CBA in healthcare.

ABOUT THE SERIES Series editors Alastair Gray and Andrew Briggs. Economic evaluation of health intervention is a growing specialist field and this series of practical handbooks tackles in depth topics superficially addressed in more general economics books. Each volume includes illustrative material, case histories and worked examples to encourage the reader to apply the methods discussed, with supporting material provided online. The series is aimed at health economists in academia, the pharmaceutical industry and the health sector, those on advanced health economics courses and health researchers in associated fields.

There has been an exponential increase in the volume and quality of published research relating to spine care over the last several decades. Among thousands of articles, a small fraction has been shown to be truly game changing, forcing the entire field to pause and take notice. These landmark studies may describe a new procedure or surgical approach, evaluate the relative effects of known treatments or techniques, introduce a new classification system, or provide new insights into natural history or disease prognosis. Such studies form the foundations of spine surgery today. This book will be a useful reference not only to the established spine surgeon but also to neurosurgery and orthopedic residents as well as to spine surgery fellows as they continue to fortify their knowledge surrounding spinal disorders. Further, this will no doubt serve as a useful evidence-based resource for trainees studying for professional examinations and perhaps most importantly, challenge and inspire clinicians to produce high quality impactful research.
