Contract to Report Alfred Basta,Nadine Basta,Waqar Anwar,2024-02-28 Protect your system or web application with this accessible guide Penetration tests also known as pen tests are a means of assessing the security of a computer system by simulating a cyber attack These tests can be an essential tool in detecting exploitable vulnerabilities in a computer system or web application averting potential user data breaches privacy violations losses of system function and more With system security an increasingly fundamental part of a connected world it has never been more important that cyber professionals understand the pen test and its potential applications Pen Testing from Contract to Report offers a step by step overview of the subject Built around a new concept called the Penetration Testing Life Cycle it breaks the process into phases guiding the reader through each phase and its potential to expose and address system vulnerabilities The result is an essential tool in the ongoing fight against harmful system intrusions In Pen Testing from Contract to Report readers will also find Content mapped to certification exams such as the CompTIA PenTest Detailed techniques for evading intrusion detection systems firewalls honeypots and more Accompanying software designed to enable the reader to practice the concepts outlined as well as end of chapter questions and case studies Pen Testing from Contract to Report is ideal for any cyber security professional or advanced student of cyber security **Disconnect** Tero Karppi,2018-10-16 An urgent examination of the threat posed to social media by user disconnection and the measures websites will take to prevent it No matter how pervasive and powerful social media websites become users always have the option of disconnecting right Not exactly as Tero Karppi reveals in this disquieting book Pointing out that platforms like Facebook see disconnection as an existential threat and have undertaken wide ranging efforts to eliminate it Karppi argues that users ability to control their digital lives is gradually dissipating

Taking a nonhumancentric approach Karppi explores how modern social media platforms produce and position users within a system of coded relations and mechanisms of power For Facebook disconnection is an intense affective force It is a problem of how to keep users engaged with the platform but also one of keeping value attention and desires within the system Karppi uses Facebook s financial documents as a map to navigate how the platform sees its users Facebook s plans to connect the entire globe through satellites and drones illustrates the material webs woven to keep us connected Karppi analyzes how Facebook s interface limits the opportunity to opt out even continuing to engage users after their physical death Showing how users have fought to take back their digital lives Karppi chronicles responses like Web2 0 Suicide Machine an art project dedicated to committing digital suicide For Karppi understanding social media connectivity comes from unbinding the bonds that stop people from leaving these platforms Disconnection brings us to the limit of user policies algorithmic control and platform politics Ultimately Karppi s focus on the difficulty of disconnection rather than the ease of connection reveals how social media has come to dominate human relations
