Atomic Doctors James L. Nolan Jr.,2020-08-06 Physicians were essential to the Manhattan Project keeping participants and Americans near test sites safe from radiation But they also downplayed the risks when military exigency demanded James Nolan tells the story of these conflicted healers who used their medical authority to enable the most lethal form of warfare humanity has yet devised The US Military and the Pacific Environment Andrew C. Isenberg,Beth Bailey,Paul Landsberg,2025-07-08 Oceans and deserts jungles and plains mountains and rivers monsoons and blizzards fertile grounds and diseased lands all have shaped how strategy and technology have been deployed and developed and all have supported unexpected victories and decimated even the best laid plans Conversely warfare and militarization have shaped the environment by scarring landscapes accelerating the global spread of disease unbalancing ecosystems and contributing to climate change Reflecting on the inextricable reciprocal and often surprising relationship between the natural world and human warfare these essays offer a new perspective on power knowledge and the environment in US military history The history of US military engagement in the Pacific powerfully demonstrates the profound and diverse impacts that regions extraordinarily diverse environments have wrought on warfare US military action has also had profound impacts in the Pacific from the nuclear weapons testing programs of the Cold War to the use of chemical defoliants in Vietnam The contributors to this volume consider how the physical environments of the Pacific shaped the process and outcome of battles and wars and discuss the effect warfare and other military actions had on these physical environments **East Central Europe and Communism** Sabrina P. Ramet,2023-03-23 The communists of East Central Europe came to power promising to bring about genuine equality paying special attention to achieving gender equality to build up industry and create prosperous societies and to use music art and literature to promote socialist ideals Instead they never succeeded in filling more than a third of their legislatures with women and were unable to make significant headway against entrenched patriarchal views they considered it necessary with the sole exception of Albania to rely heavily on credits to build up their economies eventually driving them into bankruptcy and the effort to instrumentalize the arts ran aground in most of the region already by 1956 and in Yugoslavia by 1949 Communism was all about planning control and politicization Except for Yugoslavia after 1949 the communists sought to plan and control not only politics and the economy but also the media and information religious organizations culture and the promotion of women which they understood in the first place as involving putting women to work Inspired by the groundbreaking work of Robert K Merton on functionalist theory this book shows how communist policies were repeatedly undermined by unintended consequences and outright dysfunctions Monthly Catalog of United States Government Publications United States. The Biological Weapons Taboo Michelle Bentley,2023-09-19 The non use of biological weapons has been described as the great mystery of biological warfare The Biological Weapons Taboo solves that mystery by analysing the bioweapons taboo in the first comprehensive study of the concept Bentley explains precisely why bioweapons are perceived as repulsive and

how this sentiment is consequently expressed in the form of political behaviours including the refusal to engage in biological aggression Drawing on extensive archival evidence this volume looks back on United States foreign policy decision making particularly in relation to the Geneva Protocol and the Biological Weapons Convention to demonstrate how and why the taboo has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust stigmatization and fetishization

The Human Paradox Frank Gaffikin,2023-06-16 In The Human Paradox Worlds Apart in a Connected World author Frank Gaffikin probes widely and meticulously into our past and present to analyse the connections between the many acute polarisations that mark contemporary times Addressing profound issues related to Trumpism Brexit the outbreak of Covid 19 and ensuing pandemic and environmental change the book argues that beneath all the present social tumult lies a fundamental dilemma for human stability and progress namely how we can be estranged from what we refer to as humanity The book begins with an appraisal of populism and authoritarian nationalism and later explores whether in our human development we are bound for enhancement or extinction Interrogating these big ideas further the book identifies three central challenges that confront us as a society living on the planet living with the planet and living with one another on the planet These challenges prompt a re think of what it is to be human and social and hinging on these key themes the book thus concludes with consideration of a radical agenda for future social improvement Rather than peering through the conventional lenses offered by separate disciplines this book argues for interdisciplinary appreciation and recognition especially so if we are to address the dilemma at the center of its concern The Human Paradox will appeal to readers interested in the major conflicts of our times as well as students of subjects including sociology politics history and economics
