Exploring Continued Fractions: From the Integers to Solar Eclipses Andrew J. Simoson, 2021-04-30 There is a nineteen year recurrence in the apparent position of the sun and moon against the background of the stars a pattern observed long ago by the Babylonians In the course of those nineteen years the Earth experiences 235 lunar cycles Suppose we calculate the ratio of Earth's period about the sun to the moon's period about Earth That ratio has 235/19 as one of its early continued fraction convergents which explains the apparent periodicity Exploring Continued Fractions explains this and other recurrent phenomena astronomical transits and conjunctions lifecycles of cicadas eclipses by way of continued fraction expansions The deeper purpose is to find patterns solve puzzles and discover some appealing number theory The reader will explore several algorithms for computing continued fractions including some new to the literature He or she will also explore the surprisingly large portion of number theory connected to continued fractions Pythagorean triples Diophantine equations the Stern Brocot tree and a number of combinatorial sequences The book features a pleasantly discursive style with excursions into music The Well Tempered Clavier history the Ishango bone and Plimpton 322 classics the shape of More's Utopia and whimsy dropping a black hole on Earth's surface Andy Simoson has won both the Chauvenet Prize and Pólya Award for expository writing from the MAA and his Voltaire's Riddle was a Choice magazine Outstanding Academic Title This book is an enjoyable ramble through some beautiful mathematics For most of the journey the only necessary prerequisites are a minimal familiarity with mathematical reasoning and a sense of fun

Big Ideas in Primary Mathematics Robert Newell, 2021-04-07 This book explains big ideas in

mathematics in simple terms supported by classroom examples to show how they can be applied in primary schools to enable learning Carefully linked to the National Curriculum it covers all the major concepts so you can develop your own mathematical subject knowledge and to give you the confidence to deepen your understanding of the children you teach This second edition includes A new links with mastery feature showing how to teach with mastery in mind A new glossary of key terms New big ideas and activities throughout *The Routledge International Handbook of the Crimes of the Powerful* Gregg Barak,2015-06-05 Across the world most people are well aware of ordinary criminal harms to person and property Often committed by the powerless and poor these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations In contrast the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals groups and national states are neither calculated by governmental agencies nor annually reported by the mass media As a result most citizens of the world are unaware of the routinized crimes of the powerful even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers marketplaces taxpayers and political systems as well as acts of torture terrorism and genocide This international handbook offers a comprehensive authoritative and structural synthesis of these interrelated topics of criminological concern It also explains why the crimes of the powerful are so difficult to control Edited by internationally acclaimed criminologist Gregg Barak this book reflects the state of the art of scholarly research covering all the key areas including corporate global environmental and state crimes The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally Physical Modelling in Geotechnics, Volume 2 Andrew McNamara,Sam Divall,Richard Goodey,Neil Taylor,Sarah Stallebrass,Jignasha Panchal,2018-07-11 Physical Modelling in Geotechnics collects more than 1500 pages of peer reviewed papers written by researchers from over 30 countries and presented at the 9th International Conference on Physical Modelling in Geotechnics 2018 City University of London UK 17 20 July 2018 The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions The books represent a substantial body of work in four years Physical Modelling in Geotechnics contains 230 papers including eight keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and geohazards including significant contributions in the area of seismic engineering ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry With this in mind there is a special themed paper on education focusing on both

undergraduate and postgraduate teaching as well as practicing geotechnical engineers Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called megafuges of 1000gtonne capacity or more capable of modelling the largest and most complex of geotechnical challenges Physical Modelling in Geotechnics will be of interest to professionals engineers and academics interested or involved in geotechnics geotechnical engineering and related areas The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering ISSMGE City University of London are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference Eurofuge ten years ago in 2008 Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers in particular the opportunity to attend an international conference in this rapidly evolving specialist area This is volume 2 of a 2 volume set *Superalloys 2020* Sammy Tin,Mark Hardy,Justin Clews,Jonathan Cormier,Qiang Feng,John Marcin,Chris O'Brien,Akane Suzuki,2020-08-28 The 14th International Symposium on Superalloys Superalloys 2020 highlights technologies for lifecycle improvement of superalloys In addition to the traditional focus areas of alloy development processing mechanical behavior coatings and environmental effects this volume includes contributions from academia supply chain and product user members of the superalloy community that highlight technologies that contribute to improving manufacturability affordability life prediction and performance of superalloys **Reinventing Fire** Amory Lovins,2011-10-15 Oil and coal have built our civilization created our wealth and enriched the lives of billions Yet their rising costs to our security economy health and environment now outweigh their benefits Moreover that long awaited energy tipping point where alternatives work better than oil and coal and compete purely on cost is no longer decades in the future It is here and now And it is the fulcrum of economic transformation A global clean energy race has emerged with astounding speed The ability to operate without fossil fuels will define winners and losers in business and among nations In Reinventing Fire Amory Lovins and Rocky Mountain Institute offer a new vision to revitalize business models end run Washington gridlock and win the clean energy race not forced by public policy but led by business for enduring profit This groundbreaking roadmap reveals market based solutions across the transportation building industry and electricity sectors It highlights pathways and competitive strategies for a 158% bigger 2050 U S economy that needs no oil no coal no nuclear energy one third less natural gas and no new inventions This transition would cost 5 trillion less than business as usual without counting fossil fuels huge hidden costs It requires no new federal taxes subsidies mandates or laws The policy innovations needed to unlock and speed it need no Act of Congress Whether you care most about profits and jobs national security health or environmental stewardship Reinventing Fire charts a pragmatic course that makes sense and makes

money With clarity and mastery Lovins and RMI point out the astounding opportunities for enterprises to create the new energy era Drawing praise from President Bill Clinton former National Security Advisor Robert McFarlane and a host of others Reinventing Fire has piqued the interest of world leaders business leaders and political strategists **An Anthology of Visual Double Stars** Bob Argyle, Mike Swan, Andrew James, 2019-08-29 Modern telescopes of even modest aperture can show thousands of double stars Many are faint and unremarkable but hundreds are worth searching out Veteran double star observer Bob Argyle and his co authors take a close up look at their selection of 175 of the night sky s most interesting double and multiple stars The history of each system is laid out from the original discovery to what we know at the present time about the stars Wide field finder charts are presented for each system along with plots of the apparent orbits and predicted future positions for the orbital systems Recent measurements of each system are included which will help you to decide whether they can be seen in your telescope as well as giving advice on the aperture needed Double star observers of all levels of experience will treasure the level of detail in this guide to these jewels of the night sky **Math Instruction for Students with Learning Difficulties** Susan Perry Gurganus, 2021-11-29 This richly updated third edition of Math Instruction for Students with Learning Difficulties presents a research based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK 12 teachers Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics this essential text addresses teacher and student attitudes towards mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors Chapters on assessment and instruction precede strands that focus on critical concepts Replete with suggestions for class activities and field extensions the new edition features current research across topics and an innovative thread throughout chapters and strands multi tiered systems of support as they apply to mathematics instruction Thinking, Childhood, and Time Walter Omar Kohan, Barbara Weber, 2020-10-06 Thinking Childhood and Time Contemporary Perspectives on the Politics of Education is an interdisciplinary exploration of the notion of childhood and its place in a philosophical education Contributors consider children s experiences of time space embodiment and thinking By acknowledging Hannah Arendt s notion that every child brings a new beginning into the world they address the question of how educators can be more responsive to the Otherness that childhood offers while assuming that most educational models follow either a chronological model of child development or view children as human beings that are lacking The contributors explore childhood as a philosophical concept in children adults and even beyond human beings Childhood as a forgotten dimension of the world Contributors also argue that a pedagogy that does not aim for an exodus of childhood but rather responds to the arrival of a new human being responsibly dialogically fosters a deeper appreciation of the newness that children bring in order to sensitize us for our own Childhood as adults as well and allow us to welcome other forms of childhood in the world As a whole this book argues that the experience of natality such as the beginning of life

is not chronologically determined but rather can occur more than once in a human life and beyond Scholars of philosophy education psychology and childhood studies will find this book particularly useful

Murphy, Jana B.

Singer, 2015-06-26 Over the past thirty years there has been a dramatic shift in the way the legal system approaches and resolves family disputes Traditionally family law dispute resolution was based on an adversary system two parties and their advocates stood before a judge who determined which party was at fault in a divorce and who would be awarded the rights in a custody dispute Now many family courts are opting for a problem solving model in which courts attempt to resolve both legal and non legal issues At the same time American families have changed dramatically Divorce rates have leveled off and begun to drop while the number of children born and raised outside of marriage has increased sharply Fathers are more likely to seek an active role in their children s lives While this enhanced paternal involvement benefits children it also increases the likelihood of disputes between parents As a result the families who seek legal dispute resolution have become more diverse and their legal situations more complex In *Divorced from Reality* Jane C Murphy and Jana B Singer argue that the current problem solving model fails to address the realities of today s families The authors suggest that while today s dispute resolution regime may represent an improvement over its more adversary predecessor it is built largely around the model of a divorcing nuclear family with lawyers representing all parties a model that fits poorly with the realities of today s disputing families To serve the families it is meant to help the legal system must adapt and reshape itself **Nutrient**

Flows and associated environmental impacts in livestock supply chains. Guidelines for assessment Food and Agriculture Organization of the United Nations, 2018-09-27 The aim of the methodology developed in these guidelines is to introduce a harmonized international approach assessing nutrient flows and impact assessment for eutrophication and acidification for livestock supply chains taking the specificity of the various production systems involved into consideration The methodology strives to increase understanding of nutrient use efficiency and associated environmental impacts and to facilitate the improvement of livestock systems environmental performance The guidelines are a product of the Livestock Environmental Assessment and Performance LEAP Partnership a multi stakeholder initiative whose goal is to improve the environmental sustainability of livestock sector through better metrics and data Nutrient use in livestock production systems increased over the last decades due to the increased demand for livestock production This demand is mainly driven by the increase in the population growth population income and urbanization Consequently in livestock supply chains nutrient losses into the environment have contributed to environmental burdens such as climate change air and water pollution degradation of soil quality loss of biodiversity and human health issues Therefore there is strong interest in measuring nutrient flows to improve the environmental performance of the livestock sector The objectives of these guidelines are To develop a harmonized science based approach resting on a consensus among the sector s stakeholders To recommend a

scientific but at the same time practical an approach that builds on existing or developing methodologies To promote a harmonised approach to assess nutrient flows and impact assessment relevant for global livestock supply chains To identify the principal areas where ambiguity or differing views exist concerning the methodological framework During the development process these guidelines were submitted for technical review and public review The purpose is to strengthen the advice provided and ensure it meets the needs of those seeking to improve nutrient use efficiency and environmental performance through sound assessment practice This document is not intended to remain static It will be updated and improved as the sector evolves and more stakeholders become involved in the LEAP and as new methodological frameworks and data become available The guidelines developed by the LEAP Partnership gain strength because they represent a multi actor coordinated cross sectoral and international effort to harmonize assessment approaches Ideally the harmonization leads to greater understanding transparent application and communication of metrics and not least real and measurable improvement in environmental performance

Climate Extremes and Their Implications for Impact and Risk

Assessment Jana Sillmann, Sebastian Sippel, Simone Russo, 2019-11-19 Climate extremes often imply significant impacts on human and natural systems and these extreme events are anticipated to be among the potentially most harmful consequences of a changing climate However while extreme event impacts are increasingly recognized methodologies to address such impacts and the degree of our understanding and prediction capabilities vary widely among different sectors and disciplines Moreover traditional climate extreme indices and large scale multi model intercomparisons that are used for future projections of extreme events and associated impacts often fall short in capturing the full complexity of impact systems Climate Extremes and Their Implications for Impact and Risk Assessment describes challenges opportunities and methodologies for the analysis of the impacts of climate extremes across various sectors to support their impact and risk assessment It thereby also facilitates cross sectoral and cross disciplinary discussions and exchange among climate and impact scientists The sectors covered include agriculture terrestrial ecosystems human health transport conflict and more broadly covering the human environment nexus The book concludes with an outlook on the need for more transdisciplinary work and international collaboration between scientists and practitioners to address emergent risks and extreme events towards risk reduction and strengthened societal resilience Provides an overview about past present and future changes in climate and weather extremes and how to connect that knowledge to impact and risk assessment under global warming Presents different approaches to assess societal relevant impacts and risk of climate and weather extremes including compound events and the complexity of risk cascades and the interconnectedness of societal risk Features applications across a diversity of sectors including agriculture health ecosystem services and urban transport
