

2. Can you detect ST-segment elevation?

- T waves very early become tall and peaked
- The TP-segment is the preferred reference point for determination of ST-segment elevation
- If the ST-segment is elevated more than 1 mm, it may be consistent with STEMI

normal, ST-segment elevation is measured at a certain distance from the J point. For ACS, pattern interpretation measurement is made 0.04 second (or one small box) after the J point.

When deciding the answer to this question, remember to look for signs of early repolarization and distinguish it from ST elevation due to an injury current.

If you can answer No to question 2, your ECG interpretation ends and the patient should be transferred to the most appropriate hospital.

If the answer is Yes, then continue to the next question.
