Those are wonderful ambitions but are not backed by experience You see trading can be learned of course but the experience can't be transmitted It has to be constructed by every individual through a personal effort of understanding and hard work Another thing that is important to understand is that you will never ever stop learning Markets are changing every day and the Forex is a living organism that evolves in the same way as all its traders Always remember that although it seems to be an unknown entity at the end of the day the market is merely made up of investors large and small from all corners of the world each with his or her own emotions psychology and predictable behaviors and reactions Do you ever walk up to a doctor and ask him or her if there is a shortcut to reaching where he or she has reached Would you do that to an engineer or a renowned sportsperson These people have developed their skills over time They have honed their abilities as much as possible before they could use them fluently It is the same with trading in the Forex market You need to put in effort to learn the tricks of the trade no pun intended Learn to move on after losses Don't dwell on missed trades or lost revenue after you decide to close There will be hundreds of opportunities in the future Follow your plan and follow your system Practice every day and experience will come with time patience and discipline Don't look outside for what's already inside Leave your ego behind Be humble and smart You can't decide where the market will go so learn to see where it wants to lead you not the other way around Exit bad trades and hold on to good trades Set yourself a goal and stop trading when you have reached it This book covers the following topics Introduction to the Forex Market Forex Terminology Defining Forex Trading Benefits of Forex Trading The Principle Currencies Explained The Rules and The Players And much more Do you want to learn more Don't wait anymore press the buy now button and get started
