Carrying Capacity

- Intrinsic Density
- In the carrying capacity, the population is limited by the amount of space available

Carrying Capacity is the number of individuals in a population per unit of space. Factors limiting growth are density-dependent, which are directly related to carrying capacity. These limiting factors are known as **Density-Dependent Limiting Factors**.

Question: How does a density-dependent limiting factor affect carrying capacity?

1. **Challenge:** What do you think would happen if a density-dependent limiting factor changed?

Population - both - both - both

2. **Challenge:** Suppose a drought led to a half of the water available for a population. How do you think this would affect carrying capacity?

Population will decrease because there will be a decrease in carrying capacity.

3. **Challenge:** How do you think the carrying capacity will change if the amount of space available for a population changes?

4. **Challenge:** How do you think the amount of space available in a habitat affects the carrying capacity of a population?

The larger the space available the larger the carrying capacity will be.

5. **Challenge:** Why do you think limiting a population's space decreases the carrying capacity?

The carrying capacity of the population will decrease.

6. **Challenge:** What do you think would happen if another density-dependent limiting factor changed?
