Moriarty, 2015-02-12 This innovative work provides a state of the art overview of current thinking about the development of brand strategy Unlike other books on branding it approaches successful brand strategy from both the producer and consumer perspectives The

Science and Art of Branding makes clear distinctions among the producer's intentions, external brand realities, and consumer's brand perceptions and explains how to fit them all together to build successful brands. Co-author Sandra Moriarty is also the author of the leading Principles of Advertising textbook and she and Giep Franzen have filled this volume with practical learning tools for scholars and students of marketing and marketing communications as well as actual brand managers. The book explains theoretical concepts and illustrates them with real-life examples that include case studies and findings from large-scale market research. Every chapter opens with a mini case history and boxed inserts featuring quotes from experts appear throughout the book. The Science and Art of Branding also goes much more deeply than other works into the core concept of brand equity, employing new measurement systems only developed over the last few years. **Teachers,**

**Mindset, Motivation, and Mastery** Amy K. Conley, 2017-05-01 Growth mindset, recognition, mastery, purpose, emotional connection, intrinsic motivation, and metacognition: there is more to teaching literacy and children than books and lined paper. Research in positive psychology from the last 20 years can be translated to classroom practice. Each chapter summarizes the research and then works to make it applicable to the classroom with charts of ideas based on age, examples of effective teacher talk, and stories and explanations from both practitioners and researchers. **The Busy Parent's Guide to**

**Managing Exhaustion in Children and Teens** Laurie Hollman, 2020-06-09 Do you wonder why your child or teen seems drained, overtired, moody, anxious, and depressed? Are you uncertain if and when you should be worried about the amount of sleep they get? Exhaustion is a symptom of varied problems with a wide range of meanings. In this quick read for busy parents, you will meet many exhausted children and teens: from a two-year-old taking excessive naps to avoid feelings of loss to a sixteen-year-old super athlete with ambitious career goals. Psychoanalyst Laurie Hollman, PhD, provides insight and guidance to help your exhausted child. This mini book includes Recommendations for adequate sleep, An exploration of special problems such as kids of parents with marital problems or dual working parents, an emphasis on being the smartest kids, globally burn out, depression and anxiety, insufficient free play time, and the effects of screen time. Research about the effects of exhaustion on memory, school performance, mood regulation, pain sensitivity, and the immune function, and more. Using the 5 steps of The Parental Intelligence Way, you can learn how to identify and alleviate the various reasons your kids are exhausted and what you can do about it. parents it's heartbreaking to hear children say negative things about themselves. But as children grow older and begin thinking about the world in more complex ways they also become more self-critical. Alarming studies show that self-esteem for many children takes a sharp drop starting around age eight and this decline continues into the early teen years. So how can you turn the tide on this upsetting trend and help your child build genuine self-esteem? With this guide you'll learn that self-esteem isn't about telling kids they're special. It's about helping them embrace the freedom that comes with a quiet ego, a way of being in the world that isn't preoccupied with self-judgment and instead embraces a compassionate view of oneself and others that allows for both present awareness and personal growth. When kids are less focused on evaluating and comparing themselves with others they are freer to empathize with others, embrace learning and connect with the values that are bigger than themselves. You'll also discover how your child's fundamental needs for connection, competence and choice are essential for real self-esteem. Connection involves building meaningful and satisfying relationships that create a sense of belonging. Competence means building tangible skills. And choice is about being able to make decisions, figure out what matters and choose to act in ways that are consistent with personal values. When children are able to fulfill these three basic needs the question of "Am I good enough" is less likely to come up. If your child is suffering from low self-esteem you need a nuanced parenting approach. Let this book guide you as you help your child create unshakeable confidence and lasting well-being.

**Make: Volume 93** Dale Dougherty, 2025-04-29. Humanoid robots aren't just for mega corps and secretive startups. In this issue of *Make* we show you how to use AI programs and open source plans to experiment and build your own humanoid helpers right now. In our cover story build VoxHead, a fully animated embodied AI humanoid head from scratch. Then we catch up with Gael Langevin about the continuing evolution of open source humanoid. InMoov, new facial expressions, integrated AI and even synthetic skin. Plus humanoid robots need a trusty canine companion, build a cute athletic quadruped pupper with an AI chatbot brain and powerful QDD actuators. But how do we make all these futuristic robots move? Dive into our primer on field-oriented control for brushless motors, the tech that lets bots run and jump like never before. Then we revisit our ultimate maker tools for your workshop. The Kicker, a pie in the sky workshop from 20 years ago is now affordable for makers. But our visit to Lawrence Berkeley National Labs also shows there's always a crazier workshop out there. Plus 17 projects including: Construct a tiny houseboat for day trips and camping that packs down to fit in an SUV. Use inverse kinematics to give a robot arm sketchbot pinpoint accuracy. Fly a lively no-sew kite using Tyvek fabric and 3D printed connectors. Block print computational moiré patterns with Open Press Project and p5.js. Build a laser communicator using logic chips to send secret codes securely. Make flexible pushbuttons and switches for wearable electronics. Assemble a 100W fast charging battery bank using lithium cells salvaged from disposable vapes. And much more.
