

In-Line

The Velvet Drive® "71" and "72" designations indicate input horsepower ranges. There are two basic configurations of transmissions in the 71 and 72 ratings. The most popular model is the in-line unit. "In-line" indicates that the input and output shafts of the transmission are on the same axis.

Direct drive versions of the in-line models are frequently used on high horsepower, light weight boats. The reduction ratio versions use an additional planetary gear set to allow the use of larger propellers for greater pulling power at lower shaft speeds.
