Copyright Office,1968 The Evolution of the US Air Force Israel Guy,2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general *United States Government Organization Manual* ,1944 *United States Government Manual* ,1944 Pre-carboniferous Evolution of the San Rafael Block, Argentina Carlos Alberto Cingolani,2017-04-11 **Computers, System Science, and Evolving Society** Harold Sackman,1967 **Encyclopedia of Evolution** Stanley A. Evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial. Perhaps more than any other scientific area, evolutionary science has caused us all to question what we are, where we came from, and how we relate to the rest of the universe. The *Encyclopedia of Evolution* contains more than 200 entries that span modern evolutionary science and the history of its development. This comprehensive volume clarifies many common misconceptions about evolution. For example, many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links. In fact, most of these missing links have been found, and their modern representatives are often still alive today. The biographical entries represent evolutionary scientists within the United States who have had and continue to have a major impact on the broad outline of evolutionary science. The biographies chosen reflect the viewpoints of scientists working within the United States. Five essays that explore interesting questions resulting from studies in evolutionary science are included, as well. The appendix consists of a summary of Charles Darwin's *Origin of Species*, which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history. The five essays include: How much do genes control human behavior? What are the ghosts of evolution? Can an evolutionary scientist be religious? Why do humans die? Are humans alone in the universe?

Law of Armed Conflict Manuals, Current Challenges - A Portuguese Perspective José Alberto Azeredo Lopes, Hermínio Teodoro Maio, 2025-03-02. *Law of Armed Conflict Manuals: A Portuguese Perspective* compiles the proceedings of the international conference *A LOAC Manual for Portugal* held in December 2023, organized by the Católica Porto School of Law and the Military University Institute. This book presents a unique collaboration between academics, military professionals, and international experts addressing the key aspects of the Law of Armed Conflict (LOAC) from a Portuguese perspective. Topics range from the protection of civilians and cultural property to emerging challenges like cyber warfare and the use of autonomous systems. An important resource for those interested in international humanitarian law and military sciences, this work offers critical insights into LOAC's application, current challenges, and development within the Portuguese Armed Forces and beyond.

Circum-Arctic Lithosphere Evolution V. Pease, B. Coakley, 2018-01-03. The 5-year Circum-Arctic Lithosphere Evolution (CALE) program developed new constraints on the tectonic history of the central Amerasia basin of the Arctic Ocean. This volume is the final synthesis of the CALE program, which brought together an international team of scientists to develop integrated, multi-disciplinary understanding of the region. This approach, based on the integration of much new geological and geophysical data from onshore and offshore, is necessary to advance our understanding of this basin. Regional onshore to offshore transects are central to the 18 papers in this volume. The diverse science supporting these crust-to-mantle regional transects includes structural, geochronological, isotopic, potential fields, and seismic reflection and refraction data. Four chapters present circum-Arctic investigations by the regional CALE teams. The final chapter addresses pan-Arctic themes. This unique collaboration, relying on new data and new syntheses of existing data, sheds new light on the
