Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

How Chinese Acquire and Improve Mathematics Knowledge for Teaching Yeping Li, Rongjin Huang, 2018-05-16 While the importance of knowledge for effective instruction has long been acknowledged and the concept and structure of mathematics knowledge for teaching are far from being new the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge To improve this situation with needed consideration about a system context and policies *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers life long professional learning process in China The book includes such chapters that can help readers to make possible connections of teachers mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* brings invaluable inspirations and insights to mathematics educators and teacher educators who wish to help teachers improve their knowledge and to researchers who study this important topic beyond a static knowledge conception

Empowered Educators in Canada Carol Campbell, Ken Zeichner, Ann Lieberman, Pamela Osmond-Johnson, 2017-03-13 BEST PRACTICES FROM CANADA'S HIGH PERFORMING SCHOOL SYSTEMS Empowered Educators in Canada is one volume in a series that explores how high performing educational systems from around the world achieve strong results The anchor book Empowered Educators How High Performing Systems Shape Teaching Quality Around the World is written by Linda Darling Hammond and colleagues with contributions from the authors of this volume Empowered Educators in Canada details the core commonalities that exist across Canada with special emphasis on the localized nature of the systems a hallmark of Canadian education Canada boasts a highly educated population and the provinces territories truly value education as evidenced by the significant proportion of public funds allocated to schooling Operated by the provinces and territories participation in kindergarten primary and secondary education is close to 100% across the nation In addition to offering traditional academics secondary education includes opportunities for students to attend technical and vocational programs To demonstrate exemplary education systems the authors examine two top performing jurisdictions Alberta and Ontario which have developed strong supports for teacher development Canadian teachers are highly qualified and salary scales in all jurisdictions are typically based on a teacher's level of education and years of experience While Canada has enjoyed much educational success the education of First Nations students has historically been one of the country's more controversial and contentious issues Overall Canada is a country that is proud of its education system and places a high value on and participation in publicly funded education

Last Bell Carl Bistany, Stephanie Gruner Buckley, 2015-11-05 In the mid nineties the Alfred Glickman School was just another failing school in one of America's most violent cities Then SABIS a private for profit education provider took over Twenty years later the school is a six time silver medalist in U S News World Report's annual America's Best High Schools listing and every single graduate of the school has been offered a college place With success of this magnitude you would

think that for profit managed charter schools like SABIS would be in high demand On the contrary they are fought at every turn Why is the idea of employing for profit companies to help rescue failing public schools treated with fear and hostility Stranger still why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake Last Bell is a book about politics money and power It examines the charge that for profits running charter schools are in it for the money not the kids and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools Last Bell is a reasonable voice in a polarized debate It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future

The Politics of Education in Developing Countries Sam Hickey, Naomi Hossain, 2019-02-21 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio economic and other factors The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries Bangladesh Cambodia Ghana Rwanda South Africa and Uganda The problem of education quality is serious across the Global South The Politics of Education in Developing Countries From Schooling to Learning deploys a new conceptual framework the domains of power approach to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries 22

HC 258 - Academies and Free Schools Great Britain. Parliament. House of Commons. Education Committee,2015 The landscape of schooling in England has been transformed over the last five years Academy sponsorship has encouraged and facilitated the contribution of individuals not previously involved in education provision and laid down a challenge to maintained schools to improve or face replacement by the insurgent academy model The development of outstanding Multi Academy Trusts like Ark and Harris offers an alternative system to the one overseen by local authorities while the unified Ofsted inspection regime and published performance data generally allows fair judgment of comparative performance There is a complex relationship between attainment autonomy collaboration and accountability Current evidence does not allow the Committee to draw conclusions on whether academies in themselves are a positive force for change This is partly a matter of timing but more information is needed on the performance of individual academy chains Most academy freedoms are in fact available to all schools and Committee recommends that curriculum freedoms are also extended to maintained schools

We The Future David Pattinson,2015-08-07 America has entered a new era The Great Recession of 2007 09 completely altered the way our society approaches employment The economy is placing an increasing emphasis on knowledge and technology Our world is becoming more globalized and interconnected than ever It is undeniable our world is changing Change is a good thing but it can also be painful and I believe that Millennials have born the pain of these historic shifts more than any other group Since the start of the Recession the unemployment rate for young adults has been significantly higher than the national average Total student debt in America exceeds 1 trillion dollars And young people continue to face serious challenges in obtaining meaningful employment Despite these obstacles I believe young people have the power to achieve success in this new era But this will require major shifts in how we approach education what we expect from our government and how we plan our own careers This book is a reflection of the trends and tribulations that have made up this post Recession era and offers guidance on how to build meaningful dynamic careers It is a collection of the important conversations young people and those who advise them need to have in order to grasp success in a new economic age We are the future of America I believe the future is bright if we decide to act now

Rational Numbers to Linear Equations Hung-Hsi Wu,2020-06-18 This is the first of three volumes that together give an exposition of the mathematics of

grades 9-12 that is simultaneously mathematically correct and grade level appropriate. The volumes are consistent with CCSSM Common Core State Standards for Mathematics and aim at presenting the mathematics of K-12 as a totally transparent subject. The present volume begins with fractions then rational numbers then introductory geometry that can make sense of the slope of a line then an explanation of the correct use of symbols that makes sense of variables and finally a systematic treatment of linear equations that explains why the graph of a linear equation in two variables is a straight line and why the usual solution method for simultaneous linear equations by substitutions is correct. This book should be useful for current and future teachers of K-12 mathematics as well as for some high school students and for education professionals.
