

Background: Bird Strikes in Aviation

- Occur when a bird collides with an aircraft; usually cause little damage, but can be devastating (ex. American Airlines Flight 1549 Hudson River incident).
- Roughly 10,000 strikes are reported annually; estimates suggest that as few as half of total strikes are reported.
- Less than 8% of strikes occur above 3,000 feet and 61% occur at less than 100 feet (according to FAA Wildlife Hazard Management Manual).
- FAA estimates \$400 million in damages annually are attributed to bird strikes in the United States alone, and over \$1.2 billion in damages occur annually worldwide.
