Gauteng English Paper Grade 1:

Improving Primary Mathematics Education, Teaching and Learning Mellony Graven, Hamsa Venkat, 2017-01-19

This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education. *The Standardisation of African Languages*, 2008. South African national bibliography, 1998. Classified list with author and title index. *Drum*, 2009-04. **New Realities of Secondary Teachers' Work Lives** Pam Poppleton, John Williamson, 2004-05-10. There are many books on educational change: its origins, processes and consequences. The unique contribution of this volume lies in its careful documenting and reporting of the reactions of teachers themselves interviewed in 9 countries about the changes they have experienced and in the comparative nature of the study which employs both qualitative and quantitative methods in a complementary way. In Part One the educational background to the study in each country is described and teachers' responses to a common research semi-structured interview schedule are reported. In Part Two the same database is subjected to a statistical analysis for comparative purposes in order to reveal similarities and differences between countries. The project set out to obtain an international picture of the changes in education which have had the greatest impact on the lives of teachers to explore how actual and perceived changes have influenced teachers' experience and practice and to identify critical factors in the implementation of change. The result is a book that will enable students to familiarise themselves with practices in other countries and policy makers to evaluate the implications of changes in different social, economic and cultural environments. Linguistics and Language Behavior Abstracts, 2009.

Knowledge, Curriculum and Equity Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that

underpin educational processes and the pursuit of more equitable schooling for all
