Measuring Success Jack Buckley, Lynn Letukas, Ben Wildavsky, 2018-01-15 Once touted as the single best way to measure students from diverse backgrounds schools and experiences standardized college admissions tests are now criticized for being hopelessly biased in favor of traditionally privileged groups Out of this has emerged the test optional movement that seeks to allow students to apply to schools without sitting through the rigors of the SAT This book takes a step back and applies rigorous empirical measurements to these rival claims Drawing upon the expertise of higher education researchers admissions officers enrollment managers and policy professionals this edited volume is among the first to investigate the research and policy implications of test optional practices It was conceived in response to the editors frustration with the fragmented and incomplete state of the literature around the contemporary debate on college admissions testing Many students teachers parents policymakers frankly nearly anyone immediately outside the testing industry and college admissions have little understanding of how admissions tests are used This lack of transparency has often fueled beliefs that college assessments are biased misused or overused Decades of research on various aspects of testing such as the predictive validity of assessments makes a compelling case for their value But all too frequently researchers and admissions officers talk past one another instead of engaging substantively This collection intends to remedy the situation by bringing these disparate voices together This book is designed for provosts enrollment managers and college admissions officers seeking to strike the proper balance between uniformity and fairness

Test Fairness in the New Generation of Large-Scale Assessment Hong Jiao, Robert W. Lissitz, 2017-06-01 The new generation of tests is faced with new challenges In the K 12 setting the new learning targets are intended to assess

higher order thinking skills and prepare students to be ready for college and career and to keep American students competitive with their international peers In addition the new generation of state tests requires the use of technology in item delivery and embedding assessment in real world authentic situations It further requires accurate assessment of students at all ability levels One of the most important questions is how to maintain test fairness in the new assessments with technology innovative items and technology delivered tests In the traditional testing programs such as licensure and certification tests and college admission tests test fairness has constantly been a key psychometric issue in test development and this continues to be the case with the national testing programs As test fairness needs to be addressed throughout the whole process of test development experts from state admission and licensure tests will address test fairness challenges in the new generation assessment The book chapters clarify misconceptions of test fairness including the use of admission test results in cohort comparison the use of international assessment results in trend evaluation whether standardization and fairness necessarily mean uniformity when test takers have different cultural backgrounds and whether standardization can insure fairness More technically chapters also address issues related to how compromised items and test fairness are related to classification decisions how accessibility in item development and accommodation could be mingled with technology how to assess special populations with dyslexia using Blinder Oaxaca Decomposition for differential item functioning detection and differential feature functioning in automated scoring Overall this book addresses test fairness issues in state assessment college admission testing international assessment and licensure tests Fairness is discussed in the context of culture and special populations Further fairness related to performance assessment and automated scoring is a focus as well This book provides a very good source of information related to test fairness issues in test development in the new generation of assessment where technology is highly involved

Higher Education Admission Practices María Elena Oliveri, Cathy Wendler, 2020-01-30 Reveals practices and issues in higher education admissions which are critical factors for improving worldwide access and equity

Continent, 1914 **Who Gets In?** Rebecca Zwick, 2017-05-15 On the disputed topic of U S college admissions everyone agrees that this high stakes competition is unfair But few agree on what a fair process would be Stressing transparency in evaluating applicants Rebecca Zwick assesses the goals and criteria of different admissions policies and shows how they can fail to produce the desired results **International Milk Dealer**, 1915 **English Journal**, 1969 **Drawing Inferences From Self-selected Samples** Howard Wainer, 2013-05-13 This volume contains a collection of essays and discussions which serve as an introduction and guide to current research in the area of drawing inferences from self selected samples This topic is of direct interest to a professional audience of survey researchers pollsters market researchers policymakers statisticians demographers economists and sociologists The essays themselves and their associated critical discussions are clear and careful the contributors are among the foremost experts in the field Sociocultural Studies in Education Richard A Quantz, 2016-01-08 Sociocultural Studies in Education Critical Thinking for Democracy fills a void in the education of educators and citizens in a democracy It explores some of the fundamentals around which disagreements in education arise It presents a process with which those new to these debates can understand often confusing and entwined sets of facts and logics This book leads the reader through some general concepts and intellectual skills that provide the basis for making sense out of the debates around public education in a democracy This book can be seen as a primer on how to read texts about education It acknowledges that good teachers must be not only trained to teach but also educated about education It presents the various themes and currents found within the arguments and narratives that people use to represent public education It assumes that the more those interested in education know about how to see through the rhetoric the better they will be at discerning whose interests are served by which texts **Sex and Race Differences on Standardized Tests** United States. Congress. House. Committee on the Judiciary. Subcommittee on Civil and Constitutional Rights, 1989 **Gender and Fair Assessment** Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a

corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience *Sample Cataloging Forms* Robert B.
