

Electricity Unit Notes

Static Electricity

- Static electricity is the buildup of electrical charges on an object
- All matter is made up of atoms
- Inside atoms are protons, electrons and neutrons
- Protons are positively charged; electrons are negatively charged and neutrons are neutral
- When there is an imbalance of an electrical charge, static electricity is resulted
- Electrostatic is the science of static electricity
- To create a buildup, electrons are required to move from one object to another
- When you rub a balloon against hair all the negative electrons move to the balloon and leaves the hair with positive protons
- When you rub two objects together and create a static charge it is called charging by friction
- When an object is positively charged it contains less electrons and an object that is negatively charged contains more electrons
- Protons cannot be removed
- When a negatively charged object is placed against a neutral charged object, it attracts positive protons
- Two balloons rubbing against each other, accumulate a lot of electrons and both become negatively charged and shoes that like charges repel
- An object with a higher electron affinity will attract more electrons
