McKnight,S. Raizen,2007-05-08 A Splintered Vision An Investigation of U S Science and Mathematics Education is the US report on the curriculum analysis component of the Third International Mathematics and Science Study TIMSS which was sponsored by the International Association for the Evaluation of Educational Achievement IEA The report summarizes data from the TIMSS curriculum analysis and integrates it with teacher questionnaire data from the US Japan and Germany on science and mathematics topic coverage and instructional practices The authors of A Splintered Vision discuss and provide evidence of the unfocused nature of US mathematics and science curricular intentions textbooks and teacher practices They offer the premise that producers of US textbooks and curriculum guides have attempted to answer calls for curricular reform by adding new content to already existing materials instead of devoting time to restructuring the materials The authors also suggest that US teachers inundated with a myriad of competing visions are attempting to cover all the topics they confront in their resource documents and to meet all the instructional demands placed on them by those with a stake in education In keeping with the incremental assembly line philosophy in American society US teachers also tend to lean toward a piecemeal approach to education The authors speculate on what such practices may mean for the mathematics and science achievement of US students The work is sure to spur discussion among educational researchers policy makers and others concerned about the future of mathematics and science education in the US *Professional Journal of the United States*

Administration,1974 **School and District Leadership in an Era of Accountability** Bruce G. Barnett,Alan R.

Shoho,Alex J. Bowers,2013-09-01 Our fourth book in the International Research on School Leadership series focuses on school leadership in an era of high stakes accountability Fueled by sweeping federal education accountability reforms such as the United States No Child Left Behind NCLB and Race to the Top R2T and Australia s Performance Measurement and Reporting Taskforce school systems around the world are being forced to increase academic standards participate in high stakes testing and raise evaluation standards for teachers and principals These results driven reforms are intended to hold educators accountable for student learning and accountable to the public Anderson 2005 p 2 emphasis in original While policymakers and the public debate the merits of student achievement accountability measures P 12 educational leaders do not have the luxury to wait for clear guidance and resources to improve their schools and operating systems Instead successful leaders must balance the need to create learning communities manage the organizational climate and encourage community involvement with the consequences testing has on teacher morale and public scrutiny The chapters in this volume clearly indicate that as school leaders attend to these potentially competing forces this affects their problem solving strategies ability to facilitate change and encourage community involvement We were delighted with the responses from

colleagues around the world who were eager to share their research dealing with how leaders are functioning effectively within a high accountability environment The nine chapters in this volume provide empirical evidence of the strategies school leaders use to cope with problems and negotiate external demands while improving student performance In particular the voices and actions of principals superintendents and school board members are captured in a blend of quantitative and qualitative studies The breadth of studies is impressive ranging from case studies of individual principals to cross district comparisons to national data from the National Center for Education Statistics To highlight important findings we have organized the book into five sections The first section Chapters 2 3 and 4 highlights the problem solving strategies used by principals and superintendents when pressured to turn around low performing schools In the second section Chapters 5 and 6 attention is devoted to ways in which school leaders act as buffers by reducing the impact of external demands within their local school contexts Next Chapters 7 and 8 explore creative ways in which financial analyses can be used to assess the cost effectiveness of programs and services Chapters 9 and 10 examine how principals enact their instructional leadership roles in managing curriculum reforms and evaluating teachers Finally in the last section Chapter 11 Kenneth Leithwood synthesizes the major themes and ideas emerging across these chapters paying particular attention to practical issues influencing school leaders in this era of school reform and accountability as well as promising areas for future research

Complexity, Endogenous Money and Macroeconomic Theory Mark Setterfield, 2006-01-01 That the chapters in the volume cover such a wide range of important often fundamental topics is a proper tribute to Basil Moore s influence and contributions over his working life From the foreword by G C Harcourt Jesus College Cambridge UK During a distinguished career Basil Moore has made numerous important contributions to macroeconomics and monetary economics and is renowned as the progenitor of the horizontalist analysis of endogenous money More recently he has embraced complexity theory as part of an ongoing effort to understand macroeconomics as an evolving path dependent process This book celebrates and explores Basil Moore s interests in and contributions to monetary and macroeconomic theory *Complexity Endogenous Money and Macroeconomic Theory* features original essays by internationally acclaimed and expert authors It comprises a selection of papers on five distinct but interrelated themes economic concepts tools and methodology complexity uncertainty and path dependence the macroeconomics of endogenous money the macroeconomics of exogenous interest rates and unemployment inflation and the determination of aggregate income These papers combine to provide a comprehensive methodological and theoretical discussion of the macroeconomics of a monetary production economy The book will be of interest to professionals and research students in the fields of macroeconomics and monetary economics especially those with an interest in the Post Keynesian approach to analyzing these fields including the wide audience that has been reached by the contributions of Basil Moore himself **Activating the Primary Social Studies Classroom** Leslie Marlow, Duane Inman, 2005 In this educational era of increasing emphasis on student performance there is a definite

shortage of high interest resources through which teachers can effectively address the ten standards identified by the National Council for the Social Studies NCSS Teachers need ideas for simple low cost activities which they can do with their students to allow social studies learning to occur in an interesting engaging manner Now there is a resource designed with hands on learning opportunities that are aligned with the NCSS standards Included in this sourcebook are Assessment rubrics Student and professional technology resources Descriptions of various instructional models An appendix containing background information to facilitate the users understanding of certain activities A glossary of specialty terms and concepts used Each activity which addresses multiple standards can be used for enrichment or to accommodate students with various needs The activities feature Recommendations for interesting children s literature Links to web sites related to each activity Suggestions for adaptations or extensions to effectively meet the needs of specific students Will be of interest to pre service and in service elementary teachers who want to enliven their classrooms with student involvement and interest in social studies topics **Library Journal** ,1979 School Library Journal ,1963 *Whitaker's Books in Print* ,1998
