Denial, 2024-07-16 Academia is not by and large a kind place Individualism and competition are what count But without kindness at its core Catherine Denial suggests higher education fails students and instructors and its mission in critical ways Part manifesto part teaching memoir part how to guide A Pedagogy of Kindness urges higher education to get aggressive about instituting kindness which Denial distinguishes from niceness Having suffered beneath the weight of just getting along instructors need to shift every part of what they do to prioritizing care and compassion for students as well as for themselves A Pedagogy of Kindness articulates a fresh vision for teaching one that focuses on ensuring justice believing people and believing in people Offering evidence based insights and drawing from her own rich

experiences as a professor Denial offers practical tips for reshaping syllabi assessing student performance and creating trust and belonging in the classroom Her suggestions for concrete scalable actions outline nothing less than a transformational discipline one in which together we create bright new spaces rooted in compassion in which all engaged in teaching and learning might thrive International Large-Scale Assessments in Education Bryan Maddox,2018-11-29 This book explores the often controversial international large scale assessments ILSAs in education and offers research based accounts of international testing as a social practice Assessment exercises such as the Organisation for Economic Co operation and Development s Programme for International Student Assessment PISA produce comparable international statistics and rankings on educational performance and are influential practices that shape educational policy on a global scale The chapters in this volume written by expert researchers in the field take the reader behind the scenes to document a broad range of ILSA practices from the recruitment of countries into ILSAs to the production and performance of large scale testing and the management media reception and use of test data Based on data that is only available to expert researchers with inside access the international case study material includes examples from Australia Ecuador Germany Japan Mexico Norway Russia Scotland Slovenia Sweden the UK and the USA The volume provides important insights for teachers researchers and policy makers who use and study assessment data and who wish to evaluate its significance for educational policy and practice *Exam Literacy* Jake Hunton,2018-08-13 In *Exam Literacy* A guide to doing what works and not what doesn t to better prepare students for exams Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work Foreword by Professor John Dunlosky Read highlight reread repeat if such a revision cycle sounds all too wearily familiar you and your students need a better route to exam success And in light of the recent decision to make all subjects at GCSE linear so that students will be tested in one off sittings it will be even more important that students are well equipped to acquire and recall key content ahead of their exams In this wide ranging guide to effective exam preparation Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results With plenty of practical suggestions and subject specific examples *Exam Literacy* provides teachers with user friendly advice on how they can make the content they cover stick and shares up to date evidence based information on The nature of learning and the various types of memory How to improve students retention of knowledge and recall of content Why popular revision techniques such as rereading highlighting and summarising may not be as effective as you think How revision strategies that have been identified as being more effective such as interleaving elaborative interrogation self explanation and retrieval practice can be embedded into day to day teaching How students can be encouraged to make use of these winning strategies when revising independently *The Wrong Direction for Today's Schools* Ernest J. Zarra III,2015-07-22 *The Wrong Direction for Today s Schools* The Impact of Common Core on American Education is an in depth analysis of the newest national American education fad intended to

replace the 2002 incarnation of the ESEA No Child Left Behind Zarra delves into the seeds that produced the Common Core Standards as well as the groups involved in the political and corporate pressure to completely revamp America's K 16 education system The author lays out a strong case for political motives involving the advancement for nationalized education such as those found in select European and Asian nations Zarra also follows the funding and provides solid documentation and analysis of international and national assessments and how the funding and assessments proved pivotal in the overhaul of American education After an analysis of the underpinnings of the Common Core Standards Zarra critiques the myths and facts of the Common Core and balances these with the emerging realities impacting average Americans and their families Zarra's book is a must read and will prove to be extremely useful to all who are concerned about public private and homeschool education in America

The Framework for Success in Postsecondary Writing Nicholas N. Behm, Sherry Rankins-Robertson, 2017-03-03 Illustrates the widespread applications of the Framework for Success in Postsecondary Writing especially the eight habits of mind in helping students to be successful not only in postsecondary writing courses but also in four arenas of life academic professional civic and personal 10 to 25 David Yeager, 2024-08-06 NATIONAL BESTSELLER Acclaimed developmental psychologist David Yeager reveals the new science of motivating young people ages ten through twenty five in this groundbreaking book that is a must read for managers parents educators coaches and mentors everywhere Ambitious and revelatory 10 to 25 offers baffled adults new approaches and possibly new hope during some of their families most difficult years The Wall Street Journal Required reading for anyone who aspires to be a wise influence on the young people they care about Angela Duckworth One of the most fascinating and important books of the past decade It will change millions of lives Carol Dweck This engaging data driven book is filled with practical insights Adam Grant Imagine a world in which Gen Xers millennials and boomers interact with young people in ways that leave them feeling inspired enthusiastic and ready to contribute rather than disengaged outraged or overwhelmed That world may be closer than you think In this book based on cutting edge research psychologist David Yeager explains how to stop fearing young people's brains and hormones and start harnessing them Neuroscientists have discovered that around age ten puberty spurs the brain to crave socially rewarding experiences such as pride admiration and respect and to become highly averse to social pain such as humiliation or shame As a result young people are subtly reading between the lines of everything we say trying to interpret the hidden implications of our words to find out if we are disrespecting or honoring them Surprisingly this sensitivity to status and respect continues into the mid twenties 10 to 25 helps adults develop an ear for the difference between the right and wrong way to respect young people and avoid frustrating patterns of miscommunication and conflict Yeager explains how to adopt what he terms the mentor mindset which is a leadership style that's attuned to young people's need for status and respect Anyone can adopt the mentor mindset by following a few highly effective and easy to learn practices such as validating young people's perspectives rather than dismissing them asking them questions rather than

telling them what to do being transparent about your beliefs and goals rather than assuming that they will accurately guess your thoughts and holding them to high standards rather than coddling them Yeager's scientific experiments have shown these practices reduce a wide variety of behavior problems including school dropout unhealthy eating stress purposelessness mental health problems and more One of the biggest misconceptions about mentoring is that it takes up too much time On the contrary those who use the mentor mindset end up with more time Through back and forth conversations young people feel empowered and managers can transfer responsibility to them Young people in this age group are poised to learn grow and accomplish incredible things if only we can tap into the basic neurobiological systems that drive their motivation and behavior An essential read for anyone who interacts with young people 10 to 25 is a groundbreaking book that offers long term strategies to help nurture well adjusted independent accomplished young people who contribute to society in positive ways all while making our own lives easier

On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award

AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond

Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially

Absent from School Michael A. Gottfried, Ethan L. Hutt, 2021-03-09 In Absent from School Gottfried and Hutt offer a comprehensive and timely resource for educators and policy makers seeking to understand the

scope impact and causes of chronic student absenteeism The editors present a series of studies by leading researchers from a variety of disciplines that address which students are missing school and why what roles schools themselves play in contributing to or offsetting patterns of absenteeism and ways to assess student attendance for purposes of school accountability The contributors examine school based initiatives that focus on a range of issues including transportation student health discipline policies and protections for immigrant students as well as interventions intended to improve student attendance Only in the past two or three years has chronic absenteeism become the focus of attention among policy makers civil rights advocates and educators Absent from School provides the first critical systematic look at research that can inform and guide those who are working to ensure that every child is in school and learning every day
