The Complete Guide to Renovating Older Homes Jeanne Lawson, 2010 Old homes come with a character unmatched by recently built houses on the market. The craftsmanship is often more distinct, the architectural elements more refined, the wood floors and trims more detailed, and the structure more solid and settled. A certain amount of renovation must be done to the older homes, and remodelling your home can make it come alive, fix its flaws, enhance its interior, and even make it more eco friendly. However, renovating can be time consuming, expensive, and nerve racking, leaving the homeowner in a dust whirlwind with everything that needs to be done. This guide helps you to overcome these challenges, bringing you home owner bliss. To begin, you will learn how to estimate and stick to your renovation budget, as well as some key cost cutting techniques to help you come in under budget. You will learn what building codes to follow before you begin your project, as well as the projects you can do on your own and what you might need professional assistance on. This book takes you through the complete remodelling process from the bottom up, beginning with the foundation. The book also presents ideas for renovating your family room, bedrooms, attic, basement, kitchen, and bathroom, as well as a variety of floor plans to follow if you need some help getting started. You will learn how to select and install cabinets and counter tops, as well as how to fully update sinks, taps, appliances, baths, showers, and toilets. You will also learn how to overcome the challenges associated with water, electricity, asbestos tanks, and wells, and cesspools. There are step by step instructions for some of the most common projects, including installing drywall, upgrading windows and doors, and installing flooring. There is a section on exterior renovations which contains information on skylights, garage doors, sunrooms, decks, and pools.
