

1. **Introduction**

The purpose of this study is to investigate the effects of a new educational program on student performance. The program is designed to improve critical thinking and problem-solving skills through a series of interactive exercises and projects.

2. **Methodology**

The study was conducted using a quasi-experimental design. A group of students was selected from a large university and divided into two groups: an experimental group and a control group. The experimental group participated in the new educational program, while the control group followed the traditional curriculum.
