# Measuring Economic Activity (GDP/GNI) Handout for IB/CIE economics

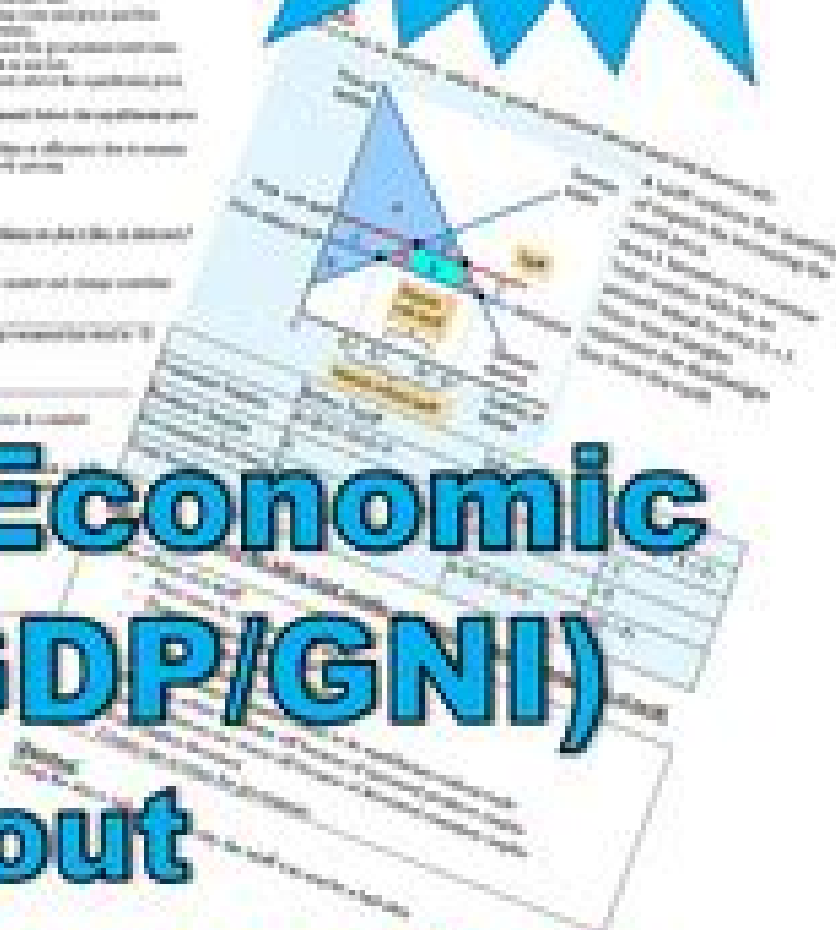

**Measuring Economic Activity**

There are two main ways to measure the total value of goods and services produced in a country. These are Gross Domestic Product (GDP) and Gross National Income (GNI).

**GDP** is the total value of all final goods and services produced within a country's borders. It is calculated by adding up the value of all final goods and services produced in a country.

**GNI** is the total value of all final goods and services produced by a country's residents, regardless of where they are produced. It is calculated by adding up the value of all final goods and services produced by a country's residents, regardless of where they are produced.

The difference between GDP and GNI is the value of net factor payments from abroad. If a country's residents receive more income from abroad than they pay to other countries, GNI will be greater than GDP. If a country's residents pay more income to other countries than they receive from abroad, GNI will be less than GDP.

Test of Understanding in Personal Economics ,1971 Is GDP a good measure of economic activity and well being? Niels Aulich,2012-06-01 Essay from the year 2012 in the subject Economics Micro economics grade A 70 Heriot Watt University Edinburgh School of Management and Languages language English abstract It is generally agreed today that a well known indicator to measure economic activities is the gross domestic product GDP Although the GDP is heavily discussed in science economics and politics it has emerged as particularly important for both economic assessment of countries and even for well being van den Bergh 2009 The main question which arises is Does the GDP illustrate a possibility to quantify economic activity and well being and thus can GDP compare countries with each other adequately This essay examines the topic Is GDP a good measure of economic activity and well being Give reasons for your answer What particular problems arise when comparing GDP across countries The structure of this paper refers to the key figure GDP The main body is separated into two parts Firstly chapter 2 1 will consider GDP as a measurement of economic activity and well being Secondly section 2 2 will examine potential limitations to compare GDP across countries by stating arguments Finally the conclusion will abstract the main arguments and will give a firm stand

**Mismeasuring Our Lives** Joseph E. Stiglitz,Amartya Sen,Jean-Paul Fitoussi,2010-04-27 In February of 2008 amid the looming global financial crisis President Nicolas Sarkozy of France asked Nobel Prize winning economists Joseph Stiglitz and Amartya Sen along with the distinguished French economist Jean Paul Fitoussi to establish a commission of leading economists to study whether Gross Domestic Product GDP the most widely used measure of economic activity is a reliable indicator of economic and social progress The Commission was given the further task of laying out an agenda for developing better measures Mismeasuring Our Lives is the result of this major intellectual effort one with pressing relevance for anyone engaged in assessing how and whether our economy is serving the needs of our society The authors offer a sweeping assessment of the limits of GDP as a

measurement of the well being of societies considering for example how GDP overlooks economic inequality with the result that most people can be worse off even though average income is increasing and does not factor environmental impacts into economic decisions In place of GDP Mismeasuring Our Lives introduces a bold new array of concepts from sustainable measures of economic welfare to measures of savings and wealth to a green GDP At a time when policymakers worldwide are grappling with unprecedented global financial and environmental issues here is an essential guide to measuring the things that matter

**Is GDP a good measure of economic activity and well being?** Sebastian Kress, 2012-04-23 Essay from the year 2012 in the subject Economics Macro economics general grade 2 Heriot Watt University Edinburgh School of Language and Management language English abstract The business world offers numerous examples of corporations benefiting from competition as they have to increase their productivity economise their cost and need to strive for innovations It is generally agreed that from a microeconomics view firms seek to win this competition which can be determined by parameters such as revenue profit or customer satisfaction Ancillary competition does not only prevail between companies on a microeconomics level but also among country s economies on a macroeconomic level This competition received a lot of attention in recent years which is also biased by the shift towards a more integrated and interdependent world economy that can be referred to as the term globalisation Hill 2011 p 24 However it needs to be questioned how to contrast the performance of one economy with the performance of another How can we assess national income or output The measure that is widely accepted and used is called gross domestic product GDP Sloman and Wride 2009 p 393 The purpose of this paper is to briefly outline what exactly incorporates in GDP and mainly to examine whether GDP is a good measure of economic activity and well being

**Measure up** Mr. Thomas F Alexander, Ms. Claudia H Dziobek, Mr. Marco Marini, Eric Metreau, Mr. Michael Stanger, 2017-02-02 To derive real GDP the System of National Accounts 2008 2008 SNA recommends a technique called double deflation Some countries use single deflation techniques which fail to capture important relative price changes and introduce estimation errors in official GDP growth We simulate the effects of single deflation to the GDP data of eight countries that use double deflation We find that errors due to single deflation can be significant but their magnitude and direction are not systematic over time and across countries We conclude that countries still using single deflation should move to double deflation

*The Financialization of GDP* Jacob Assa,2016-08-12 Gross Domestic Product GDP and other statistics based on national income accounting are ubiquitous but rarely understood today GDP has been criticized for many reasons including not reflecting well being leaving out the costs of environmental pollution and not counting unpaid work but on purely economic terms it has been mostly accepted as an indicator of economic performance In recent decades however GDP has diverged dramatically from economic trends such as employment and median income This book argues that GDP is flawed even as a narrow economic indicator and traces the problem to the way financial services are measured The first part of the book is a political history of the practice of national accounting from its beginning in the mid 17th century to present day and explores how such income estimates were constructed for political reasons The Financialization of GDP presents the practice of estimating national income as a historically and political contingent craft driven by power and not only theory culminating in the rise of the financial sector and the concomitant inclusion of financial services in GDP in 1993 The second part of the book focuses on the treatment of financial services in national accounting and develops an adjusted measure of output Final Domestic Product or FDP which treats financial revenues as intermediate inputs or costs to the economy as a whole The final part of the book explores the empirical and policy implications of treating finance as an overall cost to the economy This volume shows that the Great Moderation of volatility was a statistical artefact Okun s Law relating changes in output and unemployment never died and even provides early signs for the Great Recession which analysts using standard GDP did not see This book is of great interest to those who study political economy and macroeconomics
