3. The following is an extract from the 2013 Annual Report of SIPEF NV:
Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the prices of the agricultural produce and the absence of a liquid market, their carrying value may differ from their realisable value. Given the inherent uncertainty in applying IAS 41, discuss whether the pre-IAS 41 practice of value at historical cost is preferable for the statement of financial position.
4. Agriculture is a key business activity in many parts of the world, particularly in developing countries. Following extensive discussions with, and funding from, the World Bank, the International Accounting Standards Committee (IASC) developed an accounting standard relating to agricultural activity. IAS 41 Agriculture was published in 2001 to apply to accounting periods beginning on or after 1 January 2003. Sigma prepares financial statements to 30 September each year. On 1 October 2003 Sigma carried out the following transactions:
 - Purchased a large piece of land for \$20 million.
 - Purchased 10,000 dairy cows (average age at 1 October 2003, two years) for \$1 million.
 - Received a grant of \$400,000 towards the acquisition of the cows. This grant was non-returnable. During the year ending 30 September 2004 Sigma incurred the following costs:
