This book constitutes the thoroughly refereed post proceedings of the Web and Database Related Workshops held during the NetObjectDays international conference NODE 2002 in Erfurt Germany in October 2002 The 19 revised full papers presented together with 3 keynote papers were carefully selected during 2 rounds of reviewing and improvement The papers are organized in topical sections on advanced Web services UDDI extensions description and classification of Web services applications based on Web services indexing and accessing Web and XML databases mobile devices and the Internet and XML query languages      **InfoWorld** ,2002-01-07 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects      Service Engineering Schahram Dustdar, Fei Li, 2010-10-22 Service engineering is increasingly posing challenges to traditional software engineering methodologies including specification modeling architecture and verification just to name a few On the other hand the latest advancements in software engineering are continuously leveraged in Service Engineering research especially in the design and implementation of service oriented systems Several mutual impacts between service engineering and software engineering could be observed in the last decade and many research efforts have been devoted to the field However in spite of the considerable efforts and significant contributions few have attempted to summarize the research results systematically

**Web Services, E-Business, and the Semantic Web** Christoph Bussler, Maria E. Orlowska, Jian Yang, 2004-07-26 The 2nd Workshop on Web Services E Business and the Semantic Web WES was held during June 16 17 2003 in conjunction with CAiSE 2003 the 15th International Conference on Advanced Information Systems Engineering The Internet is changing the way businesses operate Organizations are using the Web to deliver their goods and services to find trading partners and to link their existing maybe legacy applications to other applications Web services are rapidly becoming the enabling technology of today s e business and e commerce systems and will soon transform the Web as it is now into a distributed computation and application framework On the other hand e business as an emerging concept is also impacting software applications the everyday services landscape and the way we do things in almost each domain of our life There is already a body of experience accumulated to demonstrate the difference between just having an online presence and using the Web as a strategic and functional medium in e business to business interaction B2B as well as marketplaces Finally the emerging Semantic Web paradigm promises to annotate Web artifacts to enable automated reasoning about them When applied to e services the paradigm hopes to provide substantial automation for activities such as discovery invocation assembly and monitoring of e services But much work remains to be done before realizing this vision      Automated Software and Service Composition Felix Mohr, 2016-06-17 This book is by far the most systematic and comprehensive review of the field of automated software composition Based on a formally described and reproducible methodology it critically discusses the

approaches which are relevant for experts interested in an organized overview of related work It also provides an introduction and intuitive classification system for researchers new to the field In order to create this survey several dozen papers were analyzed with respect to the concrete problems they tackle and the proposed solutions It delivers both an overview and a qualitative comparison of the approaches and answers three research questions What types of automated software composition problems exist In which use cases do these problems typically occur And what are the most prominent solution paradigms for the different types Overall this book saves a great deal of time for everyone pursuing research in the area of automated software composition who needs a comprehensive guide that helps them understand the field and that relates new approaches to existing ones      Information and Software Technologies Audrius Lopata,Rita Butkienė,Daina Gudonienė,Vilma Sukackė,2020-10-08 This book constitutes the refereed proceedings of the 26th International Conference on Information and Software Technologies ICIST 2020 held in Kaunas Lithuania in October 2020 The 23 full papers and 7 short papers presented were carefully reviewed and selected from 78 submissions The papers are organized in topical sections on business intelligence for information and software system software engineering information technology applications      *Intelligent Interactive Multimedia Systems and Services 2016* Giuseppe De Pietro,Luigi Gallo,Robert J.
