Description

MC Series Millennium Controller is a PC-based monitoring, control and data acquisition system. Designed with engine-driven compressors in mind, the MC Series is suitable for a wide range of industrial applications. As the heart of the control package, the MC series continuously monitors inputs and set points for correct operation. When an out-of-limit event occurs, the controller provides an alphanumeric readout of critical machinery data or shutdowns flash information.

In addition to the shutdown and control functions, the MC series controller provides both local and remote communications of vital equipment and operating data. This advanced system offers multiple options for remote communications. A serial link is provided for Programmable Logic Controllers, PCs and SCADA systems. Radio and satellite communications are accommodated through the MODBUS RTU protocol. Operations analysis and maintenance is facilitated by the operation history and data trending system. The shutdown snapshot feature gives operators a complete picture of system conditions at shutdowns.
