

BA Food and Nutrition

1. Nutrients

Diet	The food that you eat-provides the raw materials your body needs for energy.
Nutrients	Food substances that provide the raw materials- carbohydrates, fats, proteins, vitamins, minerals
Carbohydrates	Starch and sugar
Fats	Liquid fats are oils. Fats and oils are called lipids.
Fibre	Made of plant cell walls- not used by the body. Helps food move through the intestines and stops them getting blocked.
Uses of Water	<ul style="list-style-type: none"> • a lubricant • dissolves substances to be carried around body • fill up cells, holding shape • sweat to cool you down
Food Labels	Show the amounts of different nutrients in food.
Starch Food Test	Add 2 drops of iodine. If it turns blue-black starch is present.
Protein Food Test	Add 5 drops of biuret solution. If it turns purple protein is present.
Fat Food Test	Rub on some white paper and hold up to the light. Fat will leave a greasy mark

2. Uses of Nutrients

Uses of Carbohydrates	The body's main source of energy. bread, potatoes, pasta
-----------------------	--

Uses of Fats	Another source of energy that is stored in your body. Some is stored under the skin to insulate the body. Dairy products, fried food
Maintaining Mass	The amount of fuel you use needs to be balanced by the amount you eat.
Kilojoules (kJ)	The units for measuring the energy in food.
Respiration	The process that releases energy from food.
Energy Needs	Depends on age, sex and how active you are.
Uses of Proteins	Make new cells allowing us to grow and repair our bodies. Wheat, fish, cheese, beans, milk
Uses of Vitamins and Minerals	Used in small amounts to maintain health.
Vitamin A	Needed for healthy skin and eyes.
Vitamin C	Helps cells in tissues stick together properly.
Calcium	Needed to make bones.
Iron	Makes red blood cells.

3. Balanced Diets

Balanced Diets	Eating a range of foods in the right amounts.
Malnutrition	Having too much / too little of a nutrient in your diet.
Deficiency Disease	Caused by lacking certain nutrients for a long time.
Kwashiorkor	Lack of protein causing a 'pot belly'.
Night Blindness	Lack of vitamin A.
Scurvy	Lack of vitamin C causing painful joints and bleeding gums.

Rickets	Lack of calcium / vitamin D causing bones not to form properly.
Anaemia	Lack of iron causing tiredness and shortness of breath.
Starvation	Lacking nearly all nutrients needed.
Obesity	Caused by eating food containing more energy than you need.
Heart Attack	Fat clogs arteries so little blood reaches the heart.
Reference Intakes	How much of each nutrient should be eaten in a day.

4. Digestion

Digestion	Turning large insoluble molecules into small soluble ones.
-----------	--

Digestive System

Mouth	Teeth grind food and saliva helps digest food.
Gullet	oesophagus / food pipe Muscles contract pushing the food down.
Stomach	Food churned with acid.
Small Intestine	More digestive juices added- small digested molecules absorbed into body.
Large Intestine	Water is removed from undigested food- faeces formed.
Rectum	Stores faeces

Anus	Forces pushed out body- egestion.
Gut Bacteria	Microorganisms needed to help digest food.
Enzymes	Substances that speed up the breaking down of large molecules- biological catalysts.

5. Absorption

Digesting Starch	
Blood	Digested nutrients dissolve in the blood-plasma and are carried around the body to cells.
Diffusion	Movement of particles from an area of high concentration to low concentration.
Small Intestine Adaptations.	Has lots of tiny finger-shaped villi to increase surface area. Each villus has a folded top that forms microvilli. Villi walls are one cell thick for water diffusion.
Alcohol	Causes fewer digestive enzymes to be released and can damage villi.

The Analysis of Virtue in Alasdair MacIntyre and His View of "The Enlightenment Project" Benjamin Okon MSP,2016-04-15 MacIntyre is greatly discontented with the nature of contemporary morality which according to him has a form i e what appears like morality but lacks essential content He argues that the most common feature of contemporary ethical discourse is that much of it is used to express individual preferences which leads to disagreements among philosophers and eventually results in debates that are interminable in character MacIntyre attributes the cause of this situation to the activities of the enlightenment philosophers of the 17th and 18th centuries who in an attempt to find rational justification for morality repudiated those essential elements that define the essence of morality and give it its contents Such elements include historical narrative tradition teleology and divine law In MacIntyres opinion morality so constructed was destined for failure since it was not founded on the true nature of the human person The obvious consequences of this failure were the birth of diverse post enlightenment ethical theories and a substantial change in the conception of virtue In order to remedy this deplorable condition of contemporary ethics MacIntyre along with other virtue ethicists advocates a certain renaissance of ethical principles that are founded on the true nature of the human person characterized by historical narrative tradition and teleology all grounded on divine legislation Morality thus reconstructed finds its fullest expression in the theory of human character traits i e virtues This is what has motivated MacIntyres construction of virtue theory which has brought him into confrontation with the enlightenment philosophers Our study and analysis of MacIntyres theory of virtue reveals that his account of virtue is inadequate This inadequacy is what has motivated our own project of reconstructing MacIntyres theory of virtue in view of offering an account of virtue that is adequate In this way our own project complements that of MacIntyre

A Panorama of Statistics Eric Sowe,Peter Petocz,2017-01-03 This book is a stimulating panoramic tour quite different from a textbook journey of the world of statistics in both its theory and practice for teachers students and practitioners At each stop on the tour the authors investigate unusual and quirky aspects of statistics highlighting historical biographical and philosophical dimensions of this field of knowledge Each chapter opens with perspectives on its theme often from several points of view Five original and thought

provoking questions follow These aim at widening readers knowledge and deepening their insight Scattered among the questions are entertaining puzzles to solve and tantalising paradoxes to explain Readers can compare their own statistical discoveries with the authors detailed answers to all the questions The writing is lively and inviting the ideas are rewarding and the material is extensively cross referenced A Panorama of Statistics Leads readers to discover the fascinations of statistics Is an enjoyable companion to an undergraduate statistics textbook Is an enriching source of knowledge for statistics teachers and practitioners Is unique among statistics books today for its memorable content and engaging style Lending itself equally to reading through and to dipping into A Panorama of Statistics will surprise teachers students and practitioners by the variety of ways in which statistics can capture and hold their interest Reviews As befits the authors statement that this is not a textbook the structure is unusual There are twenty five chapters organised in five sections each beginning with a brief perspective of a theme in statistics and finishing with five questions related to that theme The answers provided to the questions in section six are as discursive and illuminating as the main body of the text Even if you are pretty sure you know the answer it is always worth checking what the authors have to say Chances are that you will learn something every time The glimpses and insights given into this enormous and far reaching discipline succeed in being bewitching entertaining and inviting coverage was never the aim In summary this splendid book lives up to the four p values of its title It is panoramic in the scope of its survey of statistics it is full of illuminating perspectives it sets entertaining and challenging puzzles and it explores fascinating paradoxes Read it enjoy it and learn from it From Neil Sheldon Teaching Statistics volume 9 no 2 May 2017

Experts,2020-01-04 Subject Guide to Books in Print ,1971 **Publishers' Circular** ,1837 **The role of evidence in**

developing effective educational inclusion Joseph Mintz,Brahm Norwich,2023-12-13 There has been considerable interest internationally in how research can be effectively translated to have an impact on practice in schools The application of evidence informed approaches in the field of education is contested and debated Such debates are intensified in relation to the issue of how best to include children with diverse learning needs in the classroom The role of knowledge science and evidence in how we both conceptualize and best support children with special educational needs and other forms of diversity in the classroom remains an open question in terms of booth policy and practice Although there is a considerable and growing body of literature on evidence informed practice in education in general there has been less attention paid to its implications for the domain of educational inclusion specifically However tensions between differing conceptualisations of difference and the role of categorisation present questions as yet not fully answered as to the ways in which evidence can and should articulate with practice in this specific domain For example issues of what is inclusion the place of norms and values that define inclusion how we conceptualize and think about difference across culture language and cognition are raised when we think about the application of evidence to practice in the area of educational inclusion **Christian Home**
