Federal Taxation 2015 Comprehensive Solution Manual:

Winning the Tax Wars Brigitte Alepin, Blanca Moreno-Dodson, Louise Otis, 2016-04-24 Over the past few decades the concentration of wealth and property in the hands of a few has been facilitated by tax evasion tax avoidance and above all by tax competition Fortunately a determined move toward international cooperation among tax authorities is gathering its forces to do battle This invaluable book shows how the globalization of trade the digitization of the economy tax competition between sovereign states the erosion of the tax base and the transfer of profits have all revealed the weaknesses of a traditional tax system that has reached its limits and how numerous states and groups of states have joined efforts in creating a new international tax system designed to restore fairness and stability in the levying of taxes worldwide Stemming from a 2016 conference initiated by the Canadian non profit organization TaxCOOP convened by the World Bank and bringing together well known taxation experts from prominent international organizations the book presents outstanding contributions highlighting the impacts of tax competition and viable solutions Among the issues and topics covered are the following electronic commerce and electronic money transfer pricing derivatives and hedge funds protecting tax whistle blowers offshore tax investigations possibility of an international tax court impact of tax competition on developing countries carbon pricing tobacco taxation and effective taxation of the ultra wealthy and their financial capital The chapters include details of country experiences and results in some cases analyzed by key protagonists themselves Collectively the contributions take a giant step toward reinforcing the power of sovereign states in sectors such as the environment education and health As an authoritative guide to increasing the level of transparency and accountability of private and public economic actors and restoring citizens trust in the fairness of our global governance systems this peerless volume will be warmly welcomed by tax lawyers taxation authorities and interested academics worldwide

Tax Justice and Global Inequality
Krishen Mehta, Esther Shubert, Erika Dayle Siu, 2020-10-29 In the wake of the Panama Papers scandal and similar leaks tax havens are now firmly in the spotlight Today roughly half of all global trade still passes through tax haven jurisdictions costing millions in lost revenue to countries around the world Such practices affect all of us but are most keenly felt by poorer people in developing countries where unfair tax practices have become a major obstacle to development and which have allowed multinational corporations to continue to exploit developing economies This collection argues that for developing countries to achieve social justice and lasting prosperity they must take control of their own tax destinies and that this will also be crucial to achieving the Sustainable Development Goals Covering such topics as natural resource management representation in global tax institutions and effective strategies for building and protecting tax bases the collection brings together expertise from a variety of countries and disciplines It explores the options available to developing countries and provides a basis for concerted action by tax authorities policy makers academics and civil society experts to design tax systems that can sustain a just society
