Illustrated Guide to the Living River has been an essential resource for understanding the full sweep of the great river's natural history and human heritage. This updated third edition includes the latest information about the ongoing fight against pollution and environmental damage to the river plus vibrant new full color illustrations showing the plants and wildlife that make this ecosystem so special. This volume gives a detailed account of the Hudson River's history including the geological forces that created it, the various peoples who have lived on its banks and the great works of art it has inspired. It also showcases the many species making a home on this waterway including the Atlantic sturgeon, the bald eagle, the invasive zebra mussel and the herons of New York Harbor. Combining both scientific and historical perspectives, this book demonstrates why the Hudson and its valley have been so central to the environmental movement. As it charts the progress made towards restoring the river ecosystem and the effects of emerging threats like climate change, The Hudson identifies concrete ways that readers can help. To that end, royalties from the sale of this book will go to the non-profit environmental advocacy group Hudson River Sloop Clearwater Inc.

Ichthyology in Context (1500-1880), 2023-12-28

Ichthyology in Context 1500-1880 provides a broad spectre of early modern manifestations of human fascination with fish, fish understood in the early modern sense of the term as *aquatilia*, all aquatic animals including sea mammals and crustaceans. It addresses the period's quickly growing knowledge about fish in its multiple, varied and rapidly changing interaction with culture. This topic is approached from various disciplines: history of science, cultural history, history of collections, historical ecology, art history, literary studies and lexicology. Attention is given to the problematic questions of visual and textual representation of fish and pre and post Linnean classification and taxonomy. This book also explores the transnational exchange of ichthyological knowledge and items in and outside Europe.
