**The AMDP System** Matthew R. Broome, Ronald Bottlender, Michael Rösler, Rolf-Dieter Stieglitz, 2018-03-21 The 9th edition of this valuable tool for assessing and documenting psychopathology now in English. Now in its 9th edition, the AMDP System is a widely used tool for documenting psychiatric symptoms in clinical and research projects. It is not only an essential part of many internal clinical documentation systems but it is also a valuable instrument for training the identification of psychopathological symptoms. This new edition now in English involved the complete revision of the psychopathological and somatic symptoms with particular attention to the elimination of ambiguities and inconsistencies to the precision of definitions to the exact differentiation of the self and other ratings as well as to the user-friendliness of the system. Taking account of developments in recent years in the description and rating of psychopathological symptoms, this latest edition of the AMDP System has been extended by an additional eleven psychopathological and three somatic symptoms and a new section on syndrome formation in the appendix. This clearly structured manual enables the standardized application of the system, making it an invaluable tool in the training of medicine and psychology students and an essential reference volume in the psychiatric field.

**The Neuropsychiatric Mental Status Examination** Taylor, 2013-11-11 There are almost as many explanations for psychiatric disorders as there are patients with them Each explanation is intriguing some of them are systematic all of them have intellectually powerful champions Yet their very multitude is a scandal It provokes the professionally debilitating challenge Why does every psychiatric explanation satisfy some people and not others Recently this question has received a simple answer We cannot satisfactorily explain that which we lack the skill to describe To develop the fundamental skill a student must see many patients under the direction of an experienced and involved instructor to whom he can show his results accept correction and advance in his abilities But we need a means to amplify the clinical experience a text to supplement the instructor in bringing forth and strengthening the vocabulary needed to describe the phenomenology presentations and distinctions amongst psychiatric patients A programmed text such as this one is a satisfactory means because it can cover rapidly many themes and variations of a vast clinical experience It can permit the reader to progress at his own speed but bring a sense of mastery to him as he progresses He can check his knowledge as he sees patients on the clinical services This kind of text combined with patient practice is thorough fast and fun but should succeed in the important task of rapidly building for the student an authentic set of terms and concepts suitable for both clinical work and research
