other sax fingering charts is that it is designed the way the brain actually thinks the right way around Now you can see in your mind how YOU would play the notes not see how someone else would play them when in front of you The issue with other sax charts is that they are not player focused they are audience focused depicting the fingerings the wrong way around A learner has to do mental gymnastics by translating and then reversing the pictures in their mind before seeing the note on their instrument It s a long winded way of going about things Why go through all that pain when you don t have to Learn as the brain thinks the first time around and then watch your playing go stratospheric as a result Contains the common alto sax fingerings from bottom B flat to past the high F sharp this also covers the altissimo notes
