

# Option 1—Work Independently

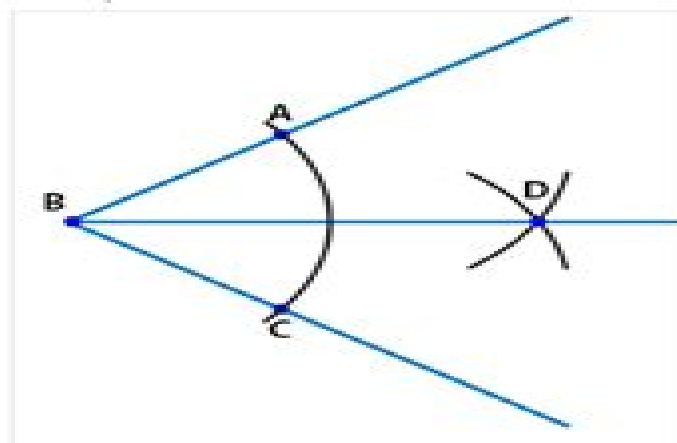

Throughout this module, you've learned about the basics of geometry and how to make constructions using a compass, a straightedge, and technology. It's time to put it all together! You will use what you have learned to tackle questions about constructions.

## Step 1: Evaluate

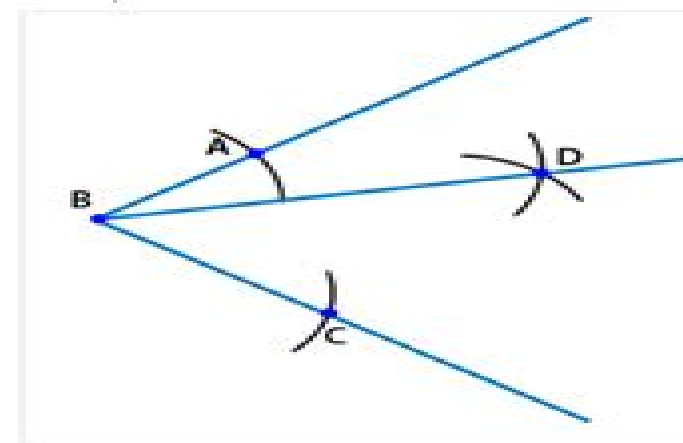

Answer the following questions:

1. Examine the two angle bisector constructions.

Example 1

Example 2

Which angle bisector was created by following the construction steps correctly? How do you know?

**Example 1 was constructed properly. I know this because it follows the proper steps to bisecting an angle. Each bisected piece looks congruent.**

Which angle bisector was constructed incorrectly? Explain the step that was completed incorrectly.

**Example 2 was constructed incorrectly. You must swing the arc so it intersects both rays when you set the compass on the angle vertex. The arc didn't intersect.**

2. Two students created a list of steps for the following construction. Which student has steps in the correct order, and which does not? Explain.

**The second student has the proper steps. Student A messed up at the "Draw a line through point C and point G" step, but point G isn't created at that point. So student B is right.**
