The Science of Proof E. Claire Cage,2022-09-01 The Science of Proof traces the rise of forensic medicine in late eighteenth and nineteenth century France and examines its implications for our understanding of expert authority Tying real life cases to broader debates the book analyzes how new forms of medical and scientific knowledge many of which were pioneered in France were contested but ultimately accepted and applied to legal problems and the administration of justice The growing authority of medical experts in the French legal arena was nonetheless subject to sharp criticism and scepticism The professional development of medicolegal expertise and its influence in criminal courts sparked debates about the extent to which it could reveal truth furnish legal proof and serve justice Drawing on a wide base of archival and printed sources Claire Cage reveals tensions between uncertainty about the reliability of forensic evidence and a new confidence in the power of scientific inquiry to establish guilt innocence and legal responsibility

Consumer Chronicles David H. Walker,2011-03-31 At a time when the world is contemplating the depletion of non renewable natural resources the consumer society is increasingly being called into question This is nowhere more acutely evident than in France where since its beginnings in the nineteenth century the consumer revolution extending market forces into every area of social and private life has been perceived as a challenge to core elements in French culture such as traditional artisan crafts and small businesses serving local communities Cultural historians and sociologists have charted the increasing commercialisation of everyday life over the twentieth century but few have paid systematic attention to the crucial testimony provided by the authors of narrative fiction

Consumer Chronicles rectifies this omission by means of close readings of a series of novels selected for their authentic portrayal of consumer behaviour and analysed in relation to their social cultural and historical contexts Walker's study offering an imaginative interdisciplinary panorama covering the impact of affluence on French shoppers shopkeepers and society provides telling new insights into the history and characteristics of the consumer mentality **Husbands, Wives, and Lovers** Patricia Mainardi, 2003-01-01 In this interdisciplinary exploration of the cultural and social history of early 19th century France Patricia Mainardi focuses on what was considered a major social problem of the time adultery In a period when expectations about marriage were changing the problems of husbands wives and lovers became a major theme in theatre literature and the visual arts The author demonstrates that this intense interest was historically grounded in the post revolutionary collision between the new concept of the individual's right to happiness and the traditional prerogatives of family and state duty or happiness more important Are arranged marriages doomed to be empty of love and poisoned by adultery Should adulterous wives and their lovers be punished while husbands may commit adultery with impunity Out of such legal social and cultural debates ultimately emerged modern bourgeois family values Mainardi argues And she illuminates how art in all its varieties both influences and is influenced by social change **Des Maladies Mentales Considérées Sous Les Rapports Médical, Hygiénique Et Médico-légal** Par E. Esquirol, 1838 Musae Reduces, Volume 1 Pierre Laurens, 2023-03-27 The print edition is available as a set of two volumes 9789004044968 **Middle French proverbs, sentences, and proverbial phrases** James Woodrow Hassell, 1982 **Sale** Anderson Galleries, Inc, 1912 **The Feminist Encyclopedia of French Literature** Eva M. Sartori, 1999-07-30 The earliest known literary productions by women living in Europe were probably written by French writers As early as the 12th century women troubadours in the south of France were writing poems French women continued writing through the ages their number increasing as education became more available to women of all classes And yet of the great number of works by women writers who preceded the current feminist movement very few have survived A few writers such as Marie de France George Sand and Simone de Beauvoir became part of the canon But critics mostly male had judged the works of only a few women writers worthy of recognition As part of the feminist move to reclaim women writers and to rethink literary history scholars in French literature began to take a new look at women writers who had been popular during their lifetimes but who had not been admitted into the canon This reference book provides extensive information about French women writers and the world in which they lived Included are several hundred alphabetically arranged entries for authors literary genres such as the novel poetry and the short story literary movements such as classicism realism and surrealism life cycle events particular to women such as menstruation and menopause events and institutions which affected women differently than men such as revolutions wars and laws on marriage divorce and education The volume spans French literature from the Middle Ages to the present and covers those writers who lived and worked mainly in France The entries are written by expert contributors and each

includes bibliographical information The entries focus on each writer's awareness of how her gender shaped her outlook and opportunities on how categorizations structures and terms used to describe literary works have been defined for women and the ways in which women writers have responded to these definitions The volume begins with a feminist history of French literature and concludes with a selected general bibliography and a chronology of women writers
