Strategic Management and Business Analysis David Williamson, Peter Cooke, Wyn Jenkins, Keith Michael Moreton, 2013-05-13 Strategic Business Analysis shows students how to carry out a strategic analysis of a business with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues especially useful for students involved with case study analysis. Accompanying the text is a CD Rom containing the models, tutorial guidance and a PowerPoint presentation. A blank template is provided for each model enabling students to actively interact and enter their own data, an effective 'what if' facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.

Strategic Management and Business Analysis Wyn Jenkins, Dave Williamson, 2015-12-18 How can managers analyze their current and future business strategies? This textbook introduces the fields of business analysis and strategic management to provide students with an understanding of the key questions that need to be asked to understand an organization's options. The second part of the book provides tools and techniques to help organize and improve corporate strategy. Uniquely, the authors provide resources to assess aspects of strategic goals which are sometimes overlooked, such as financial performance, ethical and environmental considerations, and business models. They cover a diverse range of companies from Supermarkets like Aldi and Tesco to Caermory Whiskey and Chinese manufacturing. This textbook is perfect reading for students who want to apply strategic thinking to organizations and benefits from the inclusion of new case studies throughout the text as well as 10 extended cases in a separate section.

Flood and Coastal Erosion Risk Management Edmund Penning-Rowsell, Sally Priest, Dennis Parker, Joe Morris, Sylvia Tunstall, Christophe Viavattene, John Chatterton, Damon Owen, 2014-01-03 A new Multi Coloured Manual. This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management produced by the Flood Hazard Research Centre at Middlesex University UK with support from Defra and the Environment Agency. It builds upon a previous book known as the multi coloured manual 2005 which itself was a synthesis of the blue 1977, red 1987 and yellow manuals 1992. As such it expands and updates this work to provide a manual of assessment techniques of flood risk management, benefits, indirect benefits and coastal erosion risk management benefits. It has three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit Cost Analysis to guide decision making on investment in river and coastal risk management schemes.
