Routledge Handbook of Sport Expertise Joseph Baker, Damian Farrow, 2015-03-24 Understanding and developing expertise is an important concern for any researcher or practitioner working in elite or high performance sport Whether it s identifying talented young athletes or developing methods for integrating cutting edge sport science into daily coaching practice scientists coaches and researchers all need to understand the skills characteristics and knowledge that distinguish the expert performer in sport The Routledge Handbook of Sport

Expertise is the first book to offer a comprehensive overview of current research and practice in the emerging field of sports expertise. Adopting a multi disciplinary multi faceted approach the book offers in depth discussion of methodological and philosophical issues in sport expertise as well as the characteristics that describe sporting experts and how they can be facilitated and developed. Exploring research theory and practice the book also examines how scientists and practitioners can work together to improve the delivery of applied sport science. With contributions from many of the world's leading researchers in expertise and skill acquisition in sport the Routledge Handbook of Sport Expertise is important reading for any advanced student researcher coach or sport science support officer looking to better understand this cutting edge topic.

Architectural Technology Stephen Emmitt, 2013-03-25 it gives me great pleasure to support the first ever publication to specifically address the area of research and in particular its relationship with practice in the discipline of architectural technology not only ground breaking because it is the first book of its kind but also because it provides at long last one of the accepted foundations needed to underpin the emerging academic discipline namely a recognised research base. CIAT in supporting this publication is aware of the need for books such as this to sustain the process of research informed practice as an aid for both students and those practising within the discipline of architectural technology. Norman Wienand MCIAT Vice President Education Chartered Institute of Architectural Technologists. Architectural technology is the realisation of architecture through the application of building science forming the constructive link between the abstract and the physical. Architectural Technology research and practice demonstrates the importance of research in architectural technology and aims to stimulate further research and debate by enlightening informing and challenging readers. Chapter authors address the interplay between research and practice in the field of architectural technology examining the influence of political economic social environmental and technological issues. The focus throughout is on creating sustainable buildings that are constructed economically and function effectively and efficiently within their service life cycle. The book's mix of chapters and case studies bring together a number of different themes and provides invaluable insights into the world of research from the perspective of those working within the architectural technology field practitioners academics and students. The underlying message is that architectural technology is not just a profession it is a way of thinking and a way of acting. This is highlighted by contributions from architects and architectural technologists passionate about architectural technology as a field of knowledge. Contributions range from the theoretical and polemic to the pragmatic and applied further helping to demonstrate the richness of the field. About the Editor Stephen Emmitt is Professor of Architectural Technology at Loughborough University UK and Visiting Professor of Innovation Sciences at Halmstad University Sweden and a member of CIAT's Research Group.
