 Analyze a pattern of data with the purpose of identifying a trend or trend line.
 Grade 8 Science

How do patterns of data help us understand the natural world?	
1. A pattern of data There are three patterns of data in the natural world. The first is a linear pattern, the second is a quadratic pattern, and the third is an exponential pattern.	2. Interpreting the data Patterns of data can be used to predict future events. For example, if a pattern of data shows that the temperature is increasing, we can predict that the temperature will continue to increase.
3. A pattern of data A pattern of data can be used to identify a trend. For example, if a pattern of data shows that the number of people who are getting sick is increasing, we can identify a trend that the number of people who are getting sick is increasing.	4. Using patterns Patterns of data can be used to understand the natural world. For example, if a pattern of data shows that the number of people who are getting sick is increasing, we can understand that the number of people who are getting sick is increasing.
