Congratulations on purchasing your new Ozone 500-i Multifunctional Ozone & Negative Ion Generator! Please read these instructions before operating.

Features and functions include purifying air and water, cleaning fresh foods, eliminating odors, and killing bacteria. It also works great for improving air quality in schools, hospitals, offices, homes, and businesses.

There is no maintenance required, simply wipe off the unit periodically with a damp cloth. Do not use any chemicals or cleaning agents on the unit itself.

Installation

1. First, attach the ceramic diffusion stone to the tube by wiggling the tube onto the ceramic stone connection piece. (Photo 1)
2. Next, attach the other end of the tube to the unit by wiggling the tube onto the tube connection piece (located on the right side of the unit, to the left of the "Beware Electric" warning sticker. (Photo 2)
3. Finally, plug the power cord into the power receptacle and then into a wall outlet.

Start Up

Press the On/Off button.

Then press the "Set" button to use either the Ozone Generator (RED light), or the Negative Ion Generator (GREEN Light). However, you cannot run both at once.

At this point, the air pump will start up but the unit will be on standby. Set the timer to the amount of time desired using the "+" and "-" buttons, and let it run. The unit will start to buzz, and after about a minute or so, you should be able to smell the ozone (do not directly inhale).
