Human geography consists of several sub-disciplinary fields that focus on different elements of human activity and organization.

WHAT IS POPULATION GEOGRAPHY?

Population geography is a division of human geography. It is the study of how spatial variations in distribution, composition, migration, and growth of populations are related to the nature of places.

Population geography involves demography from a geographical perspective. It focuses on the characteristics of population distribution that change in a spatial context. This often involves factors such as where the population is found and how the size and composition of these populations are regulated by demographic processes of fertility, mortality, and migration.

DEFINITION OF POPULATION GEOGRAPHY: -

Trewartha stressed that "population geography is concerned with the understanding of regional differences in the earth's covering of people."

According to Wilbur Zelensky, "the sciences deals with how the geographic character of a, its distribution and the changes taking place over some time. places are formed by and, in turn, reacts upon a set of population phenomena that vary within it through both space and time interacting one with another, and with numerous non-demographic phenomena."
