Good Choice Preservation Manual:

The Oral History Manual Barbara W. Sommer, Mary Kay Quinlan, 2024-07-23 The Oral History Manual Fourth Edition is a comprehensive and user friendly book designed to take novice or experienced oral historians through the entire life cycle of creating an oral history project from idea through planning interviewing caring for and making oral history interviews accessible It includes updated information on evolving technology including the use of and challenges associated with automated transcription apps ethical and practical considerations related to oral history and social justice including interviews with people experiencing trauma and challenges associated with real time interviews conducted in the wake of natural and human caused disasters It emphasizes that an oral historian s work is not finished when the recorder is turned off describing in detail the importance of fully processing and preserving oral histories and related materials The book emphasizes the importance of oral history practitioners providing context for their work so researchers and others who encounter the materials in the future will understand fully the circumstances in which the oral histories were created The Oral History Manual Fourth Edition also provides readers background on the evolution of oral history practice and includes appendices with sample forms that oral historians will find useful as they develop their own projects

Guide for Use of Wood Preservatives in Historic Structures Stan T. Lebow, 2012 This document provides guidance on wood preservation options in the context of historic preservation Preserving wooden building materials is critical to historic preservation practitioners Biodeterioration can be minimized through design construction practices maintenance and if necessary by use of wood preservatives Moisture is the primary cause of biodeterioration and if exposure to moisture cannot be prevented the application of preservatives or use of pressure treated wood may be warranted The Secretary of Interior s Standards for the Treatment of Historic Properties emphasize retaining the historic character of a property including distinctive materials features and spatial relationships Existing conditions should be carefully evaluated to determine the appropriate level of intervention Wood preservatives are generally grouped into two categories preservatives used for in place field remedial treatment and preservatives used for pressure treatments A limitation of in place treatments is that they cannot be forced deeply into the wood under pressure However they can be applied into the center of large wooden members via treatment holes These preservatives may be available as liquids rods or pastes Pressure treated wood has much deeper and more uniform preservative penetration than wood treated with other methods The type of pressure treated wood is often dependent on the requirements of the specific application To guide selection of pressure treated wood the American Wood Protection Association developed Use Category System standards Other preservative characteristics such as color odor and surface oiliness may also be relevant Guidelines for selection and application of field treatments and for selection and specification of pressure treated wood are provided in this document

A Graveyard Preservation Primer Lynette Strangstad, 2013-08-28 A Graveyard Preservation Primer has proven itself to be a time tested resource for those who are

seeking information regarding the protection and preservation of historic graveyards It was first written to help stewards of early burial grounds responsibly and effectively preserve their graveyards Much information found in the first edition of the book remains valid today Still much has changed in the twenty five years since its first publication and the new edition reflects these changes Attitudes and the understanding of historic graveyards as an important cultural resource have grown and developed over the years Likewise changes in treatments have also taken place Perhaps the most dramatic change in burial ground preservation is in the world of technology Changes in computers and the way we use them have also changed preservation practices in historic graveyards Discussion of technological changes in the new edition includes those in mapping surveying photography archaeology and other areas of evaluation and planning Consideration is given too to maintenance and conservation treatments including both traditional and newer treatments for stone concrete and metals Metals were not discussed in the earlier editions and protection and preservation of the landscape as it relates to graveyards is an expanded focus of this book The historic preservation of cemeteries and burial grounds is an aspect within the discipline of historic preservation that is unknown to many Those whose responsibility is the care of these historic sites may be unfamiliar with appropriate approaches to such areas as documentation planning maintenance and conservation Unwitting personnel can do irreparable harm to these important cultural resources The Primer is an effort to protect historic cultural resources by breaching the gap between maintenance staff cemetery boards friends groups and graveyard preservation professionals by offering readily available responsible information regarding graveyard protection and preservation It is also designed to assist those who would undertake a preservation project in the reclaiming of a neglected or abandoned historic cemetery The book is generously illustrated with diagrams and photos illustrating procedures and gravemarker and graveyard forms styles and materials The appendix section is completely updated and expanded offering a worthwhile resource in itself

Guide for Use of Wood Preservatives in Historic Structures Stan LeBow, Ronald W. Anthony, 2012-12-13

NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price Wood preservatives are generally grouped into two categories preservatives used for in place field remedial treatment and preservatives used for pressure treatments A limitation of in place treatments is that they cannot be forced deeply into the wood under pressure However they can be applied into the center of large wooden members via treatment holes These preservatives may be available as liquids rods or pastes Pressure treated wood has much deeper and more uniform preservative penetration than wood treated with other methods The type of pressure treated wood is often dependent on the requirements of the specific application To guide selection of pressure treated wood the American Wood Protection Association developed Use Category System standards Other preservative characteristics such as color odor and surface oiliness may also be relevant Guidelines for selection and application of field treatments and for selection and specification of pressure treated wood are provided in this document Related Products Nondestructive Evaluation of Wood is available here
