### **The Role of Intergovernmental Fiscal Transfers in Improving**

**Education Outcomes** Samer Al-Samarrai, The World Bank, Blane Lewis, 2021-07-23 The majority of the world's children live in countries where local governments are responsible for the provision of basic education services. Although subnational governments manage their own education systems, they often rely on transfers from the central government for funding. The main purpose of this study is to assess how these fiscal transfers affect public funding for education and how they ultimately affect student schooling and learning outcomes. Through a careful analysis of how fiscal transfers have affected education systems in different contexts, the investigation develops a set of principles to support improvements in the design and implementation of transfer systems with a specific focus on the provision of education services. The study is centered on seven country case studies that aim to answer a set of common research questions using a similar approach. Country case studies were conducted in Brazil, Bulgaria, China, Colombia, Indonesia, Sudan, and Uganda. The analysis shows that fiscal transfer mechanisms can improve the adequacy of public education spending, reduce spending inequalities between regions, and improve spending efficiency. Moreover, the study highlights that carefully designed and implemented transfer systems can help raise overall education outcomes and reduce education inequality. This publication was funded by a grant from the Results in Education for All Children (REACH) trust fund at the World Bank. REACH is supported by the government of Germany through the Federal Ministry for Economic Cooperation and Development, the government of Norway through NORAD, and the government of the United States of America through the U.S. Agency for International Development.

**The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia** Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2016-12-29 How does the amount of land youth expect to inherit affect their migration and employment decisions? This paper explores this question in the context of rural Ethiopia using panel data from 2010 and 2014. We estimate a household fixed effects model and exploit exogenous variation in the timing of land redistributions to overcome endogenous household decisions about how much land to bequeath to descendants. We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time. Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector. Conversely, the decision to attend school is unaffected. These results appear to be most heavily driven by males and by the older half of our youth sample. We also find several mediating factors matter. Land inheritance plays a much more

pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results suggest that inheritance strongly influences the spatial location and strategic employment decisions of youth Access, Quality, and the Global Learning Crisis Sarah Kabay,2021 The global learning crisis is one of the most critical challenges facing the world today Through a case study of over 400 schools and communities in Uganda this book presents evidence that challenges the key assumption that there is a trade off between access and quality in improving basic education around the world **OECD Economic Surveys: Luxembourg 2015** OECD,2015-03-27 This OECD Economic Survey of Luxembourg examines recent economic developments policies and prospects Special chapters cover of the financial sector and diversification of the economy *Inequality, Inclusive Growth, and Fiscal Policy in Asia* Donghyun Park,Sang-Hyop Lee,Minsoo Lee,2015-04-17 Developing Asia s sustained rapid growth has improved general living standards and lifted hundreds of millions of Asians out of poverty within a generation Yet the region now finds itself confronting rising inequality Countries where inequality has worsened over the past 2 decades collectively account for over 80% of Asia s population As a result governments across the region have begun to accord a higher priority to promoting more inclusive growth The international experience especially the experience of the advanced economies suggests that fiscal policy can make a potent contribution to reducing inequality This book systematically explores the relationship between both sides of fiscal policy public spending as well as taxes and other fiscal revenues and inequality in Asia at great depths On the basis of the analysis the book sets forth a number of concrete options for rendering fiscal policy a more effective tool for more inclusive growth that benefits all Asians *Inequality Inclusive Growth and Fiscal Policy in Asia* is written in response to an issue of growing demand in most Asian countries and it comes at a time when Asian governments are also beginning to use fiscal policy to bridge the glaring disparities between the rich and the poor of the region As such the book will be a highly valuable reference for researchers policy makers and students as well
