How Nadmo Report Disaster:

Disaster and Development Naim Kapucu, Kuotsai Tom Liou, 2014-04-11 This book offers a systematic empirical examination of the concepts of disasters and sustainable economic development applied to many cases around the world. It presents comprehensive coverage of the complex and dynamic relationship between disaster and development, making a vital contribution to the literature on disaster management, disaster resilience, and sustainable development. The book collects twenty-three chapters examining theoretical issues and investigating practical cases on policy governance and lessons learned in dealing with different types of disasters, e.g., earthquakes, floods, and hurricanes in twenty countries and communities around the world.

The Routledge Handbook on Crisis, Polycrisis, and Public Administration Kim Moloney, Gloria J. Billingsley, Bok Gyo Jeong, Pablo Sanabria-Pulido, Tonya E. Thornton, Eric Zeemering, 2025-03-18 This volume considers how local, national, and global crises with differing durations, sizes, and impacts challenge the public sector to respond. Within the public administration and policy disciplines, there has been limited recognition about the nature of linkages among and the response options for crises and polycrises when more than one crisis, emergency disaster, or catastrophe, whether human-caused or natural, simultaneously impacts citizens in one geographical location. This handbook gathers experts from different fields to explore how each crisis challenges human capacity, information technology, and communication capabilities, and how public leaders must respond. These expert contributions are grouped within five thematic sections: Structures in Crisis: A North-South Dialogue to engage national and global perspectives on how political, social, and economic structures respond during crises; Agents in Crisis: A Cross-Actor Dialogue on how agents respond to crises; Human Capital and Information Technology in Crisis, exploring how these resources interact during crises; Public Sector Communication in Crisis, examining issues of government and governance in effective crisis communication; Practitioners in Crisis, a reminder to the discipline that important context and realities are missed if practitioner realities are overlooked. Chapters in the book engage 23 countries and one overseas dependency along with 14 crisis events. Eighteen chapters are focused on one crisis event, while ten chapters directly or indirectly engage polycrises. As crises and polycrises become a constancy of our time, this volume will be of great interest to students, researchers, and practitioners of public administration and public policy.

Routledge Handbook of Resilient Urban Planning for Small and Medium-Sized Cities Seth Asare Okyere, Stephen Kofi Diko, Louis Kusi Frimpong, Matthew Abunyewah, Stephen Leonard Mensah, 2025-11-04 Small and medium-sized cities (SMCs) are becoming the new frontiers of global urban growth and population change. Yet they are overlooked in the policy and scholarship discourses about urban futures, particularly urban planning for resilient futures. This handbook aims to increase attention to the resilience of SMCs and explore the unique challenges they face, as well as provide practical recommendations for built environment practitioners to understand and respond to these challenges in global contexts. Chapters cover a range of important topics on the different dimensions of urban resilience, such as climate

induced risks heat resilience planning access to urban infrastructure and services socio environmental inequities urban safety health resilience walkability and more Contributors discuss ways to enhance policy and planning efforts to address these challenges and advocate for the need to pay attention to SMCs when promoting urban resilience to avert the risks often manifested in large cities This handbook transcends disciplinary boundaries and expertise bringing together a diverse range of contributions from scholars and practitioners in over fifteen countries across Africa Asia North and South America Europe and Oceania to counter the apparent paucity of attention on SMCs in the global resilience agenda This handbook is essential for scholars and practitioners working in the built environment such as city and regional planning public policy public health environmental science architecture landscape architecture urban design spatial planning and geography

A case study of Blekusu in the Ketu-south Municipality* Daniel Akoto, 2020-12-02 Master's Thesis from the year 2020 in the subject Environmental Sciences grade A course ENVIRONMENTAL SCIENCE POLICY AND MANAGEMENT language English abstract Climate change and its consequences have more or less become an expected occurrence and an inevitable result of the world's physical biotic and chemical processes. From global increase in temperatures continuous increase in sea level loss of arctic sea ice and changes in type distribution and coverage of vegetation climate change has become one of the worrying occurrences in the world. The impacts of climate change on Blekusu are not different from other coastal communities as the community is also a coastal community. The study was concerned with assessing the impact of climate change on Blekusu a coastal community in the Ketu South municipality. The study revealed that destruction of infrastructure as a result of the rising sea volume is one impact of climate change that is worrying the people of Blekusu. The study also revealed that construction of a sea defense wall is one way by which the destruction caused by the rising sea volume can be prevented. In this regard the study therefore recommended that the government of Ghana must ensure that existing institutions agencies and functionaries in charge of educating the public with respect to climate change and its effects in the country are adequately equipped to be able to discharge their duties effectively **Strategies for Building Resilience against Climate and Ecosystem Changes in Sub-Saharan Africa** Osamu Saito, Gordana Kranjac-Berisavljevic, Kazuhiko Takeuchi, Edwin A. Gyasi, 2017-09-19 This book summarizes studies on climate and ecosystem change adaptation and resilience in Africa CECAR Africa a collaboration with the goal of creating an integrated resilience enhancement strategy as a potential model for semi arid regions across Sub Saharan Africa by combining climate change and ecosystem change research. The case studies were conducted at multiple scales local national and regional and incorporate the natural sciences social sciences and engineering in a transdisciplinary manner while also integrating the needs of local communities. The book chiefly addresses three thematic areas namely Forecast and assessment of climate change impacts on agro ecosystems Risk assessment of extreme weather hazards and development of adaptive resource management methods and Implementing capacity development programs for local leaders and practitioners. The collaborative nature of the project and the use of various quantitative and qualitative research techniques and methods such as field surveys questionnaires focus group discussions land use and cover change analysis and climate downscaled modeling make the book truly unique. Especially at a time when both long term climate change and short term extreme weather events such as droughts and floods are worsening this book offers potential approaches to

developing an integrated framework for assessing the local ability to cope with floods and droughts and for enhancing the resilience of farming communities in developing countries which are the most vulnerable to these changes and extreme weather events As such it will be of interest to a wider audience including academics professionals and government officials alike
