

Your Perfect Brow...

1

Take a pencil or other straight edge and line it up alongside the outside of the nostril. The vertical line created shows the inside terminus of the eyebrow.

2

Next, angle the pencil so that the edge falls along the outer border of the darkest part of the eye. The point at which the line intersects the brow is the highest point of the brow arch.

3

Finally, continue tilting the pencil so that it creates a line from the outside of the nostril to the outer corner of the eye. The line extends beyond the corner of the eye to show where the outer end of the brow should be. This end of the brow should curve between the "2" and "3" points.
