Hsc Biology Circulation Chapter:

Excel HSC Biology Diane Alford, Jennifer Hill, 2008 Biology and Engineering of Stem Cell Niches Ajaykumar Vishwakarma, Jeffrey M Karp, 2017-03-22 Biology and Engineering of Stem Cell Niches covers a wide spectrum of research and current knowledge on embryonic and adult stem cell niches focusing on the understanding of stem cell niche molecules and signaling mechanisms including cell cell cell matrix interactions The book comprehensively reviews factors regulating stem cell behavior and the corresponding approaches for understanding the subsequent effect of providing the proper matrix molecules mechanical cues and or chemical cues It encompasses a variety of tools and techniques for developing biomaterials based methods to model synthetic stem cell niches in vivo or to enhance and direct stem cell fate in vitro A final section of the book discusses stem cell niche bioengineering strategies and current advances in each tissue type Includes the importance of Cell Cell and Cell Matrix Interactions in each specific tissue and system Authored and edited by authorities in this emerging and multidisciplinary field Includes valuable links to 5 10 minute YouTube author videos that describe main points Adult Stem Cell Niches Sabine Wislet, 2014-08-01 Tissue specific stem cells have the capacity to self renew and differentiate into several types of functional cells that replenish lost cells throughout an organism s lifetime Studies on stem cells from diverse systems have shown that stem cell function is controlled by extracellular cues from the niche and by intrinsic genetic programs within the stem cell The objectives of this book would be to review the molecular mechanisms that mediate the balanced response of stem cells to the needs of the organisms Likewise niches have also been linked to pathologies by imposing aberrant function on stem cells or other targets Therefore the second objective of this book would be to highlight the molecular dysregulation of niche biology leading to the disease The third objective would be to review the therapeutical targets described within stem cell niches **Essentials of Stem Cell Biology** Robert Lanza, John Gearhart, Brigid Hogan, Douglas Melton, Roger Pedersen, E.
