Superintendent of Documents,1991 **Monthly Catalog of United States Government Publications** ,1991 **American Machinist** ,1921 *The National Watercraft Collection* Howard Irving Chapelle,1960 The basic collection consisted of a large number of builder s half models used in the construction of vessels and was almost entirely of New England fishing schooners Textile Record of America ,1902 Airpower Pioneers John Andreas Olsen,2023-01-15 Airpower Pioneers studies twelve especially influential airmen detailing their impact on the evolution of the United States Air Force USAF Rather than focus on command in a series of air campaigns this book describes the personal qualities and careers of people who distinguished themselves first and foremost by advancing airpower theory doctrine and strategy and in certain cases by implementing significant organizational changes in the USAF structure Some held important positions during wartime but except for a few who excelled in both combat and peace those selected for inclusion in this volume made their main contributions to advancing aerospace power away from the front line as planners organizers educators and strategists The future of aerospace power requires airmen not only to push the limits in combat but also to emphasize publicly and frequently what is special and vital about airpower The distinctive characteristics of airpower speed range flexibility precision and lethality have improved with every new generation of aircraft and weapon systems The history of modern warfare is full of empirical evidence of airpower s relevance Looking ahead the main challenge for air forces all over the world is to match advances in technology with new ideas All air forces need visionary men and women whose reach exceeds their grasp who are determined to adapt to new security and defense realities rather than adhere to romanticized ideas of yesteryear and whose organizational skills ensure successful implementation of new ideas despite inevitable resistance to change Transient Airflow in Building Drainage Systems John Swaffield,2010-04-27 Giving you the first comprehensive presentation of the ground breaking research undertaken at Heriot Watt University with Research Council and industrial funding this book brings a new perspective to the design of building drainage and vent systems It provides the building services community with clear and verifiable design methods that will be robust enough to meet challenges such as climate change and water conservation population migration to the mega cities of the developing world and the consequent pressures of user concentration the rise of the prestige building and the introduction of new appliances and control strategies These all combine to make traditional codified design guidance insufficient Many assumptions in existing codes defining the entrained airflows within building drainage vent systems cannot be theoretically supported so designers concerned with these systems need analysis and simulation capabilities which are at least as reliable as those enjoyed by other building services practitioners The Method of Characteristics solution techniques which are well established in the pressure surge field are now used to provide solutions for drainage designers The material is applied to a

whole range of abstract scenarios then to a series of real world applications including the forensic modelling of the SARS virus spread within Amoy Gardens in 2003 and the refurbishment of the O2 Dome Applications to specialised services including underground station drainage and highly infectious disease treatment facilities are discussed and demonstrated alongside the use of design and simulation techniques in support of product development Aimed at both professional and academic users this book serves both as a design aid and as a core text for specialist masters courses in public health and building services engineering
