Husband, 2009-07-30 A guide to series fiction lists popular series identifies novels by character and offers guidance on the order in which to read unnumbered series **Dune and Philosophy** Jeffery Nicholas, 2011-04-12 Frank Herbert's Dune is the biggest selling science fiction story of all time the original book and its numerous sequels have transported millions of readers into the alternate reality of the Duniverse Dune and Philosophy raises intriguing questions about the Duniverse in ways that will be instantly meaningful to fans Those well known characters Paul Atreides Baron Harkonnen Duncan Idaho Stilgar the Bene Gesserit witches come alive again in this fearless philosophical probing of some of life's most basic questions Dune presents us with a vast world in which fanaticism is merciless and history is made by the interplay of ruthless conspiracies Computers have long been outlawed so that the abilities of human beings are developed to an almost supernatural level The intergalactic empire controlled by a privileged aristocracy raises all the old questions of human interaction in a strange yet weirdly familiar setting Do secret conspiracies direct the future course of human political evolution Can manipulation of the gene pool create a godlike individual Are strife and bloodshed essential to progress Can we know so much about the future that we lose the power to make a difference Does reliance on valuable resources such as spice oil and water place us at the mercy of those who can destroy those resources When gholas are reconstructed from the cells of dead people and given those people's memories is the ghol a the dead person resurrected Can the exploitation of religion for political ends be reduced to a technique Fans of Dune will trek through the desert of the Duniverse seeing answers to these and other questions Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared *Elemental* Brian
