

## Standard 4 Review Sheet / Key Idea 2

## Living Environment

The living things in an area interacting with their physical environment make up an ecosystem.

Organisms which can make their own food by photosynthesis are called autotrophs or producers.

primary consumers are herbivores which eat producers.

secondary consumers are consumers which eat primary consumers.

autotrophs -- organisms able to make its own food (usually using the life process of photosynthesis)

heterotrophs -- is an organism which depends upon other organisms for its food

habitat -- is the place an organism lives

niche -- is the role of an organism in the environment, especially its feeding role.

\*\* No 2 species can occupy the same ecological niche.

As the number of organisms in an ecosystem and their interactions increase, the stability of the ecosystem increases.

Organize the four ecological levels of organization from simplest to most complex.

population (one species) → community (more than one species in an area) → ecosystem (community plus physical factors) → biosphere (all parts of world where life is found)

### Life Processes

digestion -- breakdown of food to simpler molecules which can enter the cells

circulation -- the movement of materials within an organism or its cells

movement -- (locomotion) change in position by a living thing

excretion -- removal of waste products by an organism (wastes may include carbon-dioxide, water, and urea in urine and sweat)

*New Technologies for Human Rights Law and Practice* Molly K. Land,Jay D. Aronson,2018-04-19 New technological innovations offer significant opportunities to promote and protect human rights At the same time they also pose undeniable risks In some areas they may even be changing what we mean by human rights The fact that new technologies are often privately controlled raises further questions about accountability and transparency and the role of human rights in regulating these actors This volume edited by Molly K Land and Jay D Aronson provides an essential roadmap for understanding the relationship between technology and human rights law and practice It offers cutting edge analysis and practical strategies in contexts as diverse as autonomous lethal weapons climate change technology the Internet and social media and water meters This title is also available as Open Access      Oxford Textbook of Palliative Nursing Betty R. Ferrell,Nessa Coyle,Judith A. Paice,2015 The Oxford Textbook of Palliative Nursing is the definitive text on nursing care of the seriously ill and dying It is a comprehensive work addressing all aspects of palliative care including physical psychological social and spiritual needs The text is written by leaders in the field and includes an impressive section on international palliative care Each chapter includes case examples and a strong evidence base to support the highest quality of care The book is rich with tables and figures offering practical resources for clinical practice across all settings of care and encompassing all ages from pediatrics to
