

Instruction Manual for the #16 Camera

Description

The Shutter button is the small button all the way to the front.

The Power button is the larger button, right behind the shutter button.

The Reset button is located under the small pinhole situated between the USB connection and the SD card slot. It can be pressed using the end of a paper clip or similar object. Briefly pressing the reset button will force the camera to stop whatever it is doing and turn off.

The other two buttons are dummy. They have no function.

A new, fully charged battery will last about 45 minutes in the keychain model.

You may use any micro SD or micro SDHC card with a capacity of up to 32GB with this camera. To avoid card compatibility problems, always use quality cards with a speed rating of Class 4. Some cards with a faster speed rating may not work properly. The camera only supports cards formatted with FAT32. Cards larger than 32GB, for example micro SDXC will not work with this camera. See below "Breaking the Rules" of how to overcome this limitation.

► This manual does not cover replacing the internal battery or lens. Please refer to the pdf instruction manual sent with the camera if you need to do this.
