initial performance of the model so news soon travelled about the problems arising in service Eventually the lorry was withdrawn from sale Since the early 1970s when most of the 300 or so Mandator V8s sold in the UK had been withdrawn there has always been a strong undercurrent of interest shown in it AEC Mandator V8 has been out of print for many years and has been brought back in 2016 to make this fascinating story available again to AEC enthusiasts and those with an interest in general transport history Graham Edge is a trucking journalist and author Series Commercial Vehicles Archive Series Subject Commercial Vehicles Transportation **The Leyland Octopus** Graham Edge,2004-09-14 Rigid eight wheelers with internal combustion engines were developed as a response to requirements and opportunities embedded in the 1933 Road and Rail Traffic Act Although AEC was first in the field in late 1934 or early 1935 Leyland was able to announce its Octopus By the Second World War the Octopus had become a favourite with operators known to carry a legal payload economically and reliably After the war the driveline of the Octopus basically remained unchanged until 1960 Specification options were few yet the model remained a market leader with lengthy waiting lists for new chassis The model remained in production until the late 1970s and as AEC authority Graham edge writes For most of its productive life the Leyland Octopus was the definitive British eight wheeler lorry The many superb photographs in this book range from shots from the 1930s including what is probably the first Octopus chassis and a rare TEW tipper to 1979 and an Octopus 2 which started service that year with a compacting refuse body The text covers the full production story and there are Appendices which give chassis and engine details **Harry Ferguson: Inventor and Pioneer** Colin Fraser,1998-12-31 This classic biography deftly interweaves Ferguson s life and work giving complete details of the development of the TE20 and the Ferguson System It uncovers Ferguson s business dealings and examines his aviation and car pioneering *Ford Tractor Conversions* Stuart Gibbard,2019-10-01 This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural earthmoving or construction machinery County Doe Chaseside Muir Hill Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four wheel drive agricultural tractor in Britain Stuart Gibbard gives details of all the main models and machines of these manufacturers He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved **Trucks in the 1980s: The Photos of David Wakefield** Nick Ireland,2015-07-20 Many would argue that the 1980s were a better time for truck drivers than nowadays there were no cell phones there was less traffic on the road CB radio was all the rage and stickers were the simple heart of truck customizing However the transport industry is constantly evolving and companies must adapt their vehicles to keep pace with the developments As a result vehicle design and liveries regularly change Many of the companies around in the 1980s have expired and been forgotten Most of the trucks from that time are long gone to the great scrapyards in the sky David Wakefield has been working in the transport industry for over 30 years and has been taking photographs of trucks since the early 1980s
