Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book *Failure The Federal Miseducation of America s Children* As its title indicates *Failure* makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution s implication that education

must remain the domain only of state and local governments and private institutions Most of all the central government s pervasive meddling in education has failed America s school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what s gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy

Measuring National Innovation Performance Frane Adam, 2013-10-09 This book provides a critical re examination of the Innovation Union Scoreboard IUS as the main tool used by the European Commission and other policy making bodies to measure national innovation capacity Given that contemporary societies and economies are to a great extent characterised by the processes of production dissemination and application re combination of knowledge the accurate monitoring and measurement of R D efficiency and innovation performance on national regional and firm level are of outmost importance The contextual reconstruction of the model of indicators used by IUS reveals that the accuracy and validity of measurement are not satisfactory and that substantial modifications of metrics are needed to achieve stronger theoretical significance and policy relevance In this work the epistemic turn is emphasised and offered as an alternative namely in the sense of the shift from a mechanist positivist orientation toward a more reflective and contextual post positivist approach

The Turing Guide Jack Copeland, Jonathan Bowen, Mark Sprevak, Robin Wilson, 2017-02-16 Alan Turing has long proved a subject of fascination but following the centenary of his birth in 2012 the code breaker computer pioneer mathematician and much more has become even more celebrated with much media coverage and several meetings conferences and books raising public awareness of Turing s life and work This volume will bring together contributions from some of the leading experts on Alan Turing to create a comprehensive guide to Turing that will serve as a useful resource for

researchers in the area as well as the increasingly interested general reader The book will cover aspects of Turing's life and the wide range of his intellectual activities including mathematics code breaking computer science logic artificial intelligence and mathematical biology as well as his subsequent influence Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas **Social Robots in Education** Georgios Lampropoulos,Stamatios Papadakis,2025-05-03 This book focuses on recent advances in the field of social robots and their integration in education It elaborates on the progressive evolution of human robot interaction and educational robotics the emergence of digital pedagogy and the implementation of personalized learning methodologies The book also examines the use of artificial intelligence AI in education through the lenses of social robots Hence the book offers an overview of recent research into the adoption integration advancements and impact of social robots and AI in education and presents guidelines and suggestions on how to integrate them in classrooms Specifically the book Provides an in depth overview of social robots and their use in education Presents the advances of social robots and AI in education Showcases innovative solutions and outcomes of integrating social robots in classrooms Discusses the challenges benefits and future research directions of using social robots and AI in education **Handbook of Numerical Simulation of In-Flight Icing** Wagdi George Habashi,2023-12-11 This Handbook of Numerical Simulation of In Flight Icing covers an array of methodologies and technologies on numerical simulation of in flight icing and its applications Comprised of contributions from internationally recognized experts from the Americas Asia and the EU this authoritative self contained reference includes best practices and specification data spanning the gamut of simulation tools available internationally that can be used to speed up the certification of aircraft and make them safer to fly into known icing The collection features nine sections concentrating on aircraft rotorcraft jet engines UAVs ice protection systems including hot air electrothermal and others

sensors and probes CFD in the aid of testing flight simulators and certification process acceleration methods Incorporating perspectives from academia commercial government R D the book is ideal for a range of engineers and scientists concerned with in flight icing applications **Semiclassical Standing Waves with Clustering Peaks for Nonlinear Schrodinger Equations** Jaeyoung Byeon, Kazunaga Tanaka,2014-04-07

The authors study the following singularly perturbed problem in Their main result is the existence of a family of solutions with peaks that cluster near a local maximum of A local variational and deformation argument in an infinite dimensional space is developed to establish the existence of such a family for a general class of nonlinearities *Materials and Water Chemistry for Supercritical Water-cooled Reactors* David

Guzonas,Radek Novotny,S. Pentilla,Aki Toivonen,Wenyue Zheng,2017-10-31 Materials and Water Chemistry for Supercritical Water cooled Reactors is unique in that it brings together materials and water chemistry their interrelationship the historical perspective and their application to SCWR conceptual design Written by world s leading experts all active in the area of materials and chemistry R D in support of GEN IV SCWR this book presents for the first time a comprehensive reference on these topics and in particular how these data relate to the SCWR design itself This book is an essential text for researchers in the areas of supercritical water cooled reactor materials and chemistry working in industry or academia It will also give newcomers to the field a survey of all of the available literature and a clear understanding of how these studies relate to the design of the SCWR concept The material presented is at a specialist s level in materials or corrosion science or in water chemistry of power plants Provides comprehensive coverage of the chemistry and materials of SCWR Presents the latest research and results condensed into one book Covers the differences in use of SCW in nuclear reactors and fossil plants and the resulting differences in materials requirements Exploring the Contexts for Early Learning Rory McDowall

Clark,2016-09-01 The concept of readiness for school is attractive to policy makers but many academics researchers and practitioners argue that an early start to formal learning may be misguided This book introduces readers to an increasing body of evidence which demonstrates that young children need opportunities to learn and develop in environments that support their emotional and cognitive needs offering opportunities to develop autonomy competence and self regulation skills With advice on implementing research findings in practice this book provides clear guidance on how to foster and develop these attributes scaffold steps into new areas of learning and support children in facing new challenges Chapters cover Policy and discourses Taking account of development Approaches to Early Years Learning The Diversity of Children s Early Experiences Transitions and starting school Where to in the Future Exploring the Contexts for Early Learning will be essential reading for students practitioners policy makers and all those interested in the school readiness agenda

Graph-Theoretic Concepts in Computer Science Pinar Heggernes,2016-09-27 This book constitutes revised selected papers from the 42nd International Workshop on Graph Theoretic Concepts in Computer Science WG 2016 held in Istanbul Turkey in June 2016 The 25 papers presented in this volume were carefully reviewed and selected from 74 submissions The

WG conferences aim to connect theory and practice by demonstrating how graph theoretic concepts can be applied to various areas of computer science and by extracting new graph problems from applications Their goal is to present new research results and to identify and explore directions of future research Collected Papers.
