

ELLIPTICAL

Information and Conditioning

PROPER POSTURE & FORM

- Stand tall with a slight forward lean at the hips (not swiveling in a hunched forward position with rounded shoulders and upper back "locking" closed).
- Push your shoulders down and away from your ears. Relax a slight bend at the elbows.
- Hold the handles with a light grip and keep elbows relaxed.
- Keep your feet in contact with the pedals at all times. The foot should remain flat against the footplate (no "planting" or "pulling" through the pedals).
- During both the forward and backward motion, avoid bouncing as this allows you to use gravity to help you move the pedals rather than your muscles resulting in a less effective workout.
- Throughout your pedal stroke to the edge of the pedal, you can place "heel" pressure on the heel or forefoot and back, depending on the stride length you prefer. Heel driving is best.
