Improving Instruction in Geometry and Measurement Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers In this book one of a three volume set well known mathematics educators Margaret Smith Edward A Silver and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction They focus on ways to engage upper elementary middle school and high school students in thinking reasoning and problem solving to build their mathematics understanding and proficiency The content focus of Volume One is rational numbers and proportionality Using materials that were developed under the NSF funded COMET Cases of Mathematics to Enhance Teaching program each volume in the set features cases from urban middle school classrooms with ethnically racially and linguistically diverse student populations Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards based instruction the teachers perspective including their thoughts and actions as they interact with students and with key aspects of mathematical content cognitively

challenging mathematics activities that are built around samples of authentic classroom practice and facilitation chapters to help professional developers teach the cases including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice. As a complete set, this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning.

100 Smart Ways to Teach Mathematics Chong An Chang, 2012-02-18 How can math magic surprise an audience? What is the personality of decimals and fractions? What is the best order to teach integer operations? What is the fence law? Can we have two cosine laws? How can two words help us study trigonometry? What function equals its inverse? These and many more topics are thoroughly explored in this book. Follow Dr. C as he takes you on a journey filled with unique cases and entertaining stories. Each of the 100 sections focuses on a different topic and introduces readers to an entirely new way of learning smart mathematics. This book represents the author's life-long teaching experience in three countries through which he developed his trademark style of conveying complex concepts with ease. The book is written in two parts and closely follows math curriculum widely used in the US and Canada. Part 1 covers material from grade 1 to 8. Part 2 is developed for high school and up. Teachers teaching any grade can find it a useful tool while students will appreciate its light-hearted but insightful delivery as a reference.
